Understanding The Factsheet

Fund Manager

An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription/Minimum Investment

This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount

This is the minimum investment amount for an existing investor in a mutual fund scheme.

SIP

SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs 500 every 15th of the month in an equity fund for a period of three years.

NAV

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Entry Load

A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs 100 and the entry load is 1%, the investor will enter the fund at Rs 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor

Exit Load

Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance if the NAV is Rs.100 and the exit load is 1%, the redemption price would be Rs.99 per unit.

Yield to Maturity/ Portfolio Yield

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity. Portfolio yield is weighted average YTM of the securities.

Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Macaulay Duration

Macaulay duration is defined as the weighted average time to full recovery of principal and interest payments of a bond i.e. the weighted average maturity of cash flows. The weight of each cash flow is determined by dividing the present value of the cash flow by the price of the bond.

Standard Deviation

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta

Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM

AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stockmarkets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Equity Oriented Funds* - Positioning

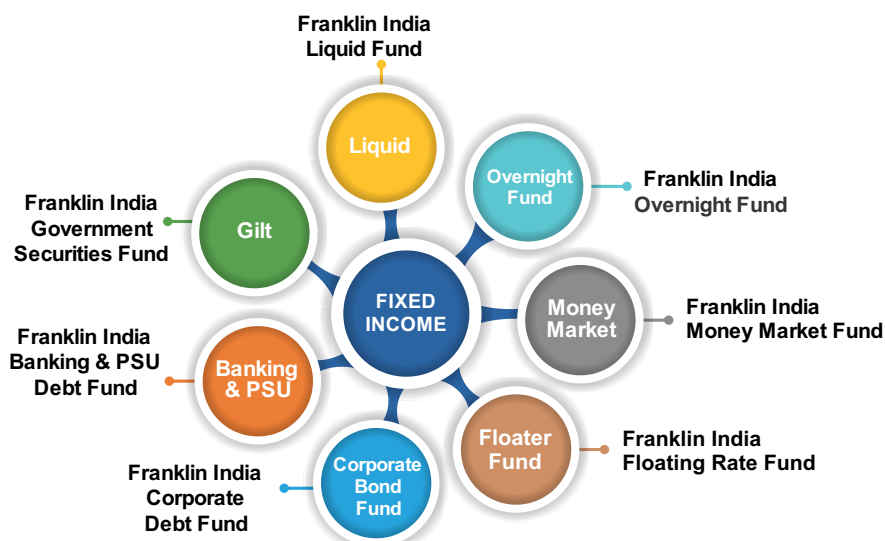

DIVERSIFIED

STYLE / THEME

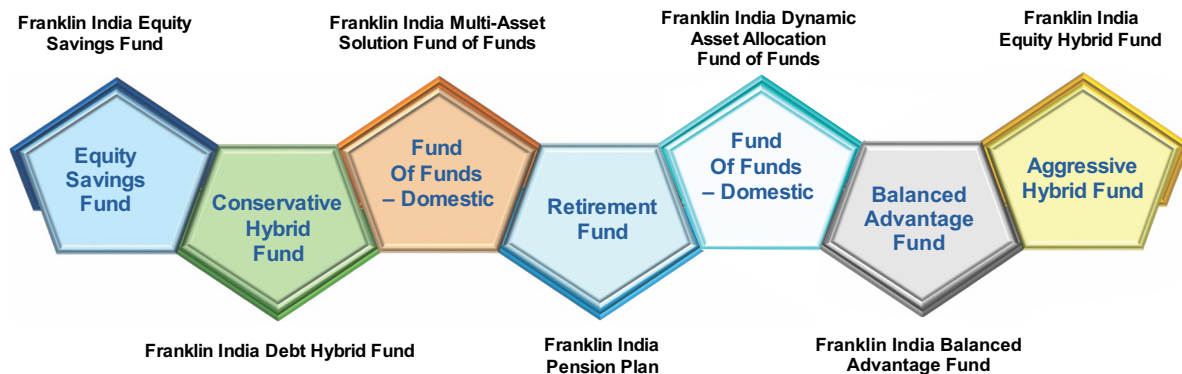

Debt Funds** - Positioning

* Includes Equity Funds, Fund Of Funds and Index Funds

** The aforesaid matrix is based on schemes classified under a particular category and latest portfolio

Hybrid / Solution Oriented / FoF-Domestic Funds - Positioning

Equity Oriented Funds* – Risk Matrix

* Includes Equity Funds, Fund Of Funds and Index Funds

FIIF: Franklin India NSE Nifty 50 Index Fund, **FIBCF:** Franklin India Bluechip Fund, **FICF:** Franklin India Flexi Cap Fund, **FIEAF:** Franklin India Equity Advantage Fund, **FIETSF:** Franklin India ELSS Tax Saver Fund, **FIFE:** Franklin India Focused Equity Fund, **TIVF:** Templeton India Value Fund, **TIEF:** Templeton India Equity Income Fund, **FIPF:** Franklin India Prima Fund, **FISC:** Franklin India Smaller Companies Fund, **FBIF:** Franklin Build India Fund, **FIOF:** Franklin India Opportunities Fund, **FITF:** Franklin India Technology Fund, **FIF-FUSOF:** Franklin India Feeder – Franklin U.S. Opportunities Fund, **FIF-TEOF:** Franklin India Feeder – Templeton European Opportunities Fund, **FAEF:** Franklin Asian Equity Fund

Note: The relative fund positioning is indicative in nature and is based on fundamental factors pertaining to relative risk return potential of 1) large caps vs mid caps vs small caps, 2) diversified vs style/theme and 3) exposure to foreign currencies. For ex: higher the mid/small cap exposure, higher the risk return potential. This is a simplified illustration of potential Risk-Return profile of the schemes and does not take into account various complex factors that may have a potential impact on the schemes.

Hybrid / Solution Oriented / FoF-Domestic MFs - Risk Matrix

FIESF: Franklin India Equity Savings Fund, **FIDHF:** Franklin India Debt Hybrid Fund, **FIPEP:** Franklin India Pension Plan, **FIMAS:** Franklin India Multi-Asset Solution Fund of Funds, **FIDAAF:** Franklin India Dynamic Asset Allocation Fund of Funds, **FIBAF:** Franklin India Balanced Advantage Fund, **FIEHF:** Franklin India Equity Hybrid Fund

Note: The relative fund positioning is indicative in nature and is based on relative risk return potential of equity and fixed income. For ex: higher the equity exposure, higher the risk return potential. This is a simplified illustration of potential Risk-Return profile of the schemes and does not take into account various complex factors that may have a potential impact on the schemes.

*This no load redemption limit is applicable on a yearly basis (from the date of allotment of such units) and the limit not availed during a year shall not be clubbed or carried forward to the next year.

^{\$} The rates specified are the actual expenses charged as at the end of the month. The above ratio includes the GST on Investment Management Fees. The above ratio also includes, proportionate charge in respect of sales beyond T-30 cities subject to maximum of 30 bps on daily net assets, wherever applicable. ⁶⁶ Sovereign Securities; Call, Cash & Other Current Assets (net of outstanding borrowings, if any) ^{*} (excluding AA+ rated corporate bonds) ^{**} dedicated for making investments for Foreign Securities

Benchmark for FIGSF has been changed to NIFTY All Duration G-Sec Index, effective from 8th September 2021. ^{***} Yield to maturity (YTM) of the portfolio is calculated by recomputing yield from simple average of valuation prices provided by valuation agencies for G-sec FRB securities. The methodology is in line with practice followed till November 17, 2021 where yield of security were not provided by the valuation agencies. ^{^ ^ ^} Yield To Maturity (YTM) of the portfolio is calculated using simple average of valuation yields provided by the valuation agencies for all securities. [#] Yields of all securities are in annualised terms

Global market performance (April 2024)

Global Equity markets were volatile for the month. The developed markets underperformed the emerging markets. The US markets saw a pullback as higher than expected inflation and resilient consumer demand raised concerns on the timeline of interest rate cuts from the US Federal Reserve. Further mixed guidance on earnings by some companies weakened investor sentiments. The Chinese markets were the top performer for the month as some actions from authorities to boost market sentiments helped the markets.

Domestic Market Performance (April 2024)

Domestic markets were positive for the month. The Nifty 50 index rose 1.2% in April 2024. The small-cap and mid-cap indices saw a sharp rebound for the month as they outperformed the large-cap indices. The Nifty Midcap 150 index gained 6.3% and the Nifty Smallcap 250 index rose 10.5%. Multiple factors contributed to the market optimism during the month including strong domestic indicators, an upgrade in India's FY25 GDP growth forecast by the IMF and World Bank, optimism over upbeat domestic quarterly results and the IMD prediction of an above-normal monsoon. RBI's decision to keep rates unchanged was on expected lines. On the sectoral front, Metals, PSU, Power, and Realty were among the top gainers for the month.

Crude oil prices – Brent

Commodity price trend

Brent crude oil prices were volatile for the month as middle eastern geopolitical risk weighed on the sentiments whereas industrial metals rose for the month on multiple factors like demand from a potential China recovery, tight supply and ban imposed on Russia by London Metal Exchange (LME) and the Chicago Mercantile Exchange (CME).

Macroeconomic indicators:

USD INR

From the closing level of the previous month, the rupee depreciated by a modest 0.05% to close at USD/INR 83.44. In the month of April 2024, Dollar Index (DXY) gained 1.7%.

Forex reserves

From the previous month end, Forex exchange reserves declined 1.19% to US\$ 637.9 billion as of April 26, 2024.

Inflation

The Consumer Price Index ("CPI") fell further to 4.9% in March 2024 from 5.1% in February, inching closer to the RBI's target. Core inflation came in at the lowest rate of 3.4% of the current series in March 2024.

Industrial production

Industrial production rose to 5.7% (YoY) in February 2024 from the previous month.

PMI Indicators

The manufacturing Purchasing Managers Index ("PMI"), an indicator of business activity, remained strong on buoyant demand due to an increase in output and new orders. Services PMI moderated slightly from last month's high, but it still remained on a strong footing due to robust demand from domestic and international markets.

GST Collection

GST collections for April 2024 stood at INR 2.10 trn. up nearly 12% YoY.

FII/DII equity flows

DII's were the net buyers for the month.

Domestic Interest rate trend

RBI kept policy rates unchanged at 6.50% and decided to remain focused on withdrawal of accommodation while ensuring that inflation progressively aligns with the target while supporting growth. The decision to hold rates and the monetary policy stance was backed by 5 out of 6 members. In both the instances Prof. Jayanth R. Varma voted to reduce the policy repo rate by 25bps and the policy stance to neutral.

Domestic Liquidity trend

Average liquidity conditions eased during the month of April 2024 largely contributed by surplus conditions during the 2nd half of April 2024. Easing of liquidity conditions can be attributed to government spending and the RBI injecting liquidity.

Yield Curve

Domestic yields were influenced by a rise in US treasury yields. The entire domestic G-sec yield curve saw an upward shift. The benchmark 10-year sovereign yield in India rose by 15bps during the month. Reflecting improvement in liquidity conditions, weighted average call rate (WACR) further eased by leaning towards the repo rate.

Equity Market Snapshot

R. Janakiraman*, CIO – Franklin Equity

Corporate earnings

Q4FY24 earnings preview hint at a continued momentum in the financial services sector led by robust systemic credit growth, asset quality improvement despite net interest margin compression. Auto sector could benefit from demand recovery, margin expansion led by operating leverage and benign commodity costs. Other sectors likely to aid earnings growth include Healthcare (stability in US generic pricing environment and strong growth in domestic formulation market), capital goods (healthy order book, better execution), consumer durables (revenue growth to be aided by demand recovery in select segments and bottoming out of price erosion), real estate (strong demand-led value growth, Improvement in occupancies and rental growth). On the other hand, earnings trend in some sectors including metals, staples (tepid volume growth and low value growth) and technology (moderating momentum for deal wins and cautious demand outlook) could likely weigh on the headline earnings growth. The consensus estimate for Nifty 50 earnings growth stands at 17% / 12% for FY24 / FY25.

Outlook:

IMF observes that global supply chain concerns are likely to ease on account of the resilience seen in global growth and with inflation starting to moderate towards target levels. IMF retains projections for global growth steady at 3.2% for 2024 and 2025 in its April 2024 outlook. India growth projections are retained at 6.8% for 2024 (0.3% higher in April 2024) and 6.5% for 2025 (steady), reflecting the strength in domestic demand.

IMF projects faster normalization of the inflation in advanced economies in 2024 versus a more gradual decline in emerging economies by 2025. Stable macroeconomic data flow in terms of benign current account deficit (strong services exports), inflation within RBI's target band, signs of rural demand recovery (two-wheeler sales up though tractor sales still moderating), credit growth continue to aid the strong growth projection for India.

Other positives include a surge in GST collection, currency stability, forex, expectation of a stable political environment as well as a conducive backdrop for private capex pick up, an uptrend seen in household capex amid the support from government capex. Growth could get more broad-based as the gaps between rural-urban consumption and private-public capex narrow.

Risks to global growth could emerge from (i) geopolitical conflict-led commodity price spikes (food, energy and transportation related) that could hamper the ongoing deflation process and delay monetary policy easing, (ii) prolonged delay in Chinese economic recovery impeding on domestic demand and impacting global growth. On the domestic front, risks could arise from unanticipated election outcome, any unforeseen spike in inflation that could upset the interest rates cycle to pause the presently anticipated shallow rate cut trend.

Indian equities continue to benefit from strong domestic institutional flows that continue to offset the outflows from foreign portfolio investor ("FPI") in April 2024. Valuations for Indian market vs emerging market equity (MSCI EM index) has reverted to long period average levels. Indian market valuations are supported by sound macroeconomic fundamentals, potential political stability and reasonably strong GDP growth projection over the next 3 years.

Opportunities for investors:

While investors may continue to invest as per their specific risk appetite and investment goals, they may seek incremental diversification based on asset class, geographies, investment style and market capitalization segments for their portfolios. It is recommended to consider staggered investment in diversified fund categories.

Fixed Income Market Snapshot

Rahul Goswami, CIO - Fixed Income

Outlook:

Growth projections for India continue to be robust. Multi-year high manufacturing and services PMI further lends to the strength of the domestic economy. Headline inflation while returning to the RBI target rate of 4.0% is facing intermittent shocks and in turn delaying its return to the RBI's target rate. However, it has remained well behaved and stayed within the RBI's tolerance band of +/- 2% of the targeted rate.

The RBI in its latest monetary policy meeting has reiterated that it would like to see the headline inflation in India reaching 4.0% on a durable basis. Even in its quarterly projection for FY 2024-25, the inflation projection briefly touches 3.8% in Q2FY25 and continues to stay above the 4.0% mark in the succeeding quarters. Above average temperatures, lower reservoir levels, spatial distribution of rainfall (IMD has projected above average monsoon for the ensuing season) could impact foodgrain production. Further escalation of geopolitical tension may disrupt the supply chain, flare up crude oil prices and in turn the inflation. In the event of extreme escalation of geopolitical tensions leading to flight to safety may lead to outflow of capital from India to the safe havens such as the US, which in turn would put pressures on the bond yields.

In view of above and after giving due consideration to positive factors such as the inclusion of Indian bonds in global indices and fiscally prudent government policies we expect the bond yields to see a range bound movement. At this juncture a relatively flat curve, offers less incentive to invest in the longer end of the curve. Also, in our assessment, high credit, short duration instruments offer the best risk reward proposition. Therefore, our fixed income portfolios investing beyond money market instruments continue to build on the currently available high carry in the short and medium duration while waiting for an opportune moment to add duration in these portfolios.

*R Janakiraman has been appointed as CIO - Franklin Equity, with effect from December 1, 2023.

Franklin India Bluechip Fund

FIBCF

As on April 30, 2024

Disclaimer :

Subscriptions to shares of the Luxembourg-domiciled SICAV Franklin Templeton Investment Funds ("the Fund") can only be made on the basis of the current prospectus, and, where available, the relevant Key Investor Information Document, accompanied by the latest available audited annual report and the latest semi-annual report if published thereafter. The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. Past performance is not an indicator or a guarantee of future performance. Currency fluctuations may affect the value of overseas investments. When investing in a fund denominated in a foreign currency, your performance may also be affected by currency fluctuations. An investment in the Fund entails risks which are described in the Fund's prospectus and in the relevant Key Investor Information Document. In emerging markets, the risks can be greater than in developed markets. Investments in derivative instruments entail specific risks more fully described in the Fund's prospectus or in the relevant Key Investor Information Document. No shares of the Fund may be directly or indirectly offered or sold to residents of the United States of America. Only Class A shares can be offered by way of a public offering in Belgium and potential investors must receive confirmation of their availability from their local Franklin Templeton Investments representative or a financial services representative in Belgium before planning any investments. Any research and analysis contained in this document has been procured by Franklin Templeton Investments for its own purposes and is provided to you only incidentally. Top Ten Holdings: These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable. The portfolio manager for the Fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top holdings list.

The expenses of the Fund of Funds scheme will be over and above the expenses charged by the underlying scheme. Investments in overseas financial assets are subject to risks associated with currency movements, restrictions on repatriation, transaction procedures in overseas markets and country related risks.

Investors cannot directly invest in the Underlying fund, as the Underlying fund is not available for distribution.

Please refer to page no. 57-60 for Product Label & Benchmark Risk-o-meter.

Composition by Assets

Composition by Rating

Please refer to page no. 57-60 for Product Label & Benchmark Risk-o-meter.

All investments in debt funds are subject to various types of risks including credit risk, interest rate risk, liquidity risk etc. Some fixed income schemes may have a higher concentration to securities rated below AA and therefore may be exposed to relatively higher risk of downgrade or default and the associated volatility in prices which could impact NAV of the scheme. Credit rating issued by SEBI registered entities is an opinion of the rating agency and should not be considered as an assurance of repayment by issuer. There is no assurance or guarantee of principal or returns in any of the mutual fund scheme.

*ICRA has assigned a credit rating of (ICRA)A1+mfs to Franklin India Overnight Fund (FIONF). The ratings assigned are basis the portfolio of the scheme with the credit score of the portfolio being comfortable at the assigned rating level.

The rating indicates ICRA's opinion on the credit quality of the portfolios held by the funds. The rating does not indicate the asset management company's (AMC) willingness or ability to make timely payments to the fund's investors. The rating should not be construed as an indication of expected returns, prospective performance of the mutual fund scheme, NAV or of volatility in its returns. ICRA's mutual fund rating methodology is based on evaluating the inherent credit quality of the fund's portfolio. As a measure of the credit quality of a debt fund's assets, ICRA uses the concept of 'credit scores'. These scores are based on ICRA's estimates of the credit risk associated with each exposure of the portfolio taking into account its maturity. To quantify the credit risk scores, ICRA uses its database of historical default rates for various rating categories and maturity buckets. The credit risk ratings incorporate ICRA's assessment of a debt fund's published investment objectives and policies, its management characteristics, and the creditworthiness of its investment portfolio. ICRA reviews relevant fund information on an ongoing basis to support its published rating opinions. If the portfolio credit score meets the benchmark of the assigned rating during the review, the rating is retained. If the benchmark credit score is breached, ICRA gives a month's time to the debt fund manager to bring the portfolio credit score within the benchmark credit score. If the debt fund manager is able to reduce the portfolio credit score within the benchmark credit score, the rating is retained. If the portfolio continues to breach the benchmark credit score, the rating is revised to reflect the change in the credit quality.

Composition by Rating

*ICRA has assigned a credit rating of (ICRA)A1 + mfs to Franklin India Liquid Fund (FILF). ICRA's mutual fund rating methodology is based on evaluating the inherent credit quality of the funds portfolio. As a measure of the credit quality of a debt fund's assets, ICRA uses the concept of 'credit scores'. These scores are based on ICRA's estimates of credit risk associated with each exposure of the portfolio taking into account its maturity. To quantify the credit risk scores, ICRA uses its database of historical default rates for various rating categories for various maturity buckets. The credit risk Rating incorporate ICRA's assessment of a debt fund's published investment objectives and policies, its management characteristics, and the creditworthiness of its investment portfolio. ICRA reviews relevant fund information on an ongoing basis to support its published rating opinions. If the portfolio credit score meets the benchmark of the assigned rating during the review, the rating is retained. In an event that the benchmark credit score is breached, ICRA gives a month's time to the debt fund manager to bring the portfolio credit score within the benchmark credit score. If the debt fund manager is able to reduce the portfolio credit score within the benchmark credit score, the rating is retained. If the portfolio still continues to breach the benchmark credit score, the rating is revised to reflect the change in credit quality.

CRISIL Ratings' assessment of a rated fund's credit quality is based on the creditworthiness of the fund's portfolio. CRISIL Ratings has developed a credit quality matrix to assess the aggregate credit quality of a fund's underlying portfolio. The matrix is a set of credit factors and credit scores derived scientifically from the default and transition rates of CRISIL Ratings' long-term ratings. The credit factors reflect the expected default behaviour of the respective securities in the portfolio, and the expected deterioration in their credit quality. The lower the credit factor for each security, the higher would be its inherent credit quality. The credit factors are applied to the proportion of securities held in each rating category to arrive at the credit score for the portfolio. The rating on the fund is assigned on the basis of the fund's total credit score. A rated fund needs to maintain, at all times, a credit score consistent with its assigned rating. An evaluation of the portfolio investments done for the last six months indicates that Franklin India Liquid Fund has maintained its credit score consistently. The assigned rating is valid only for 'Franklin India Liquid Fund'. The rating of CRISIL Ratings is not an opinion of the AMC's willingness or ability to make timely payments to the investor. The rating is also not an opinion on the stability of the NAV of the Fund, which could vary with market developments.

All investments in debt funds are subject to various types of risks including credit risk, interest rate risk, liquidity risk etc. Some fixed income schemes may have a higher concentration to securities rated below AA and therefore may be exposed to relatively higher risk of downgrade or default and the associated volatility in prices which could impact NAV of the scheme. Credit rating issued by SEBI registered entities is an opinion of the rating agency and should not be considered as an assurance of repayment by issuer. There is no assurance or guarantee of principal or returns in any of the mutual fund scheme.

"India Ratings and Research (Ind-Ra) has assigned a credit rating of "IND A1+mfs" to "Franklin India Money Market Fund". Ind-Ra's National Scale Money Market Fund Rating primarily focuses on the investment objective of preservation of capital. India Ratings reviews, among other factors, applicable fund regulation, track record of the fund industry, industry standards and practices. An India Ratings MMF rating is primarily based on an analysis of the fund's investment policy. India Ratings expects MMFs to be diversified and to adhere to conservative guidelines limiting credit, market and liquidity risks. India Ratings typically requests monthly portfolio holdings and relevant performance statistics to actively monitor national scale MMF Ratings. Ratings do not guarantee the return profile or risk attached to the investments made. Ratings are not a recommendation or suggestion, directly or indirectly, to you or any other person, to buy, sell, make or hold any investment, loan or security or to undertake any investment strategy with respect to any investment, loan or security or any issuer. Ratings do not comment on the adequacy of market price, the suitability of any investment, loan or security for a particular investor (including without limitation, any accounting and/or regulatory treatment), or the tax-exempt nature or taxability of payments made in respect of any investment, loan or security. India Ratings is not your advisor, nor is India Ratings providing to you or any other party any financial advice, or any legal, auditing, accounting, appraisal, valuation or actuarial services. A rating should not be viewed as a replacement for such advice or services.

CRISIL Ratings' assessment of a rated fund's credit quality is based on the creditworthiness of the fund's portfolio. CRISIL Ratings has developed a credit quality matrix to assess the aggregate credit quality of a fund's underlying portfolio. The matrix is a set of credit factors and credit scores derived scientifically from the default and transition rates of CRISIL Ratings' long-term ratings. The credit factors reflect the expected default behaviour of the respective securities in the portfolio, and the expected deterioration in their credit quality. The lower the credit factor for each security, the higher would be its inherent credit quality. The credit factors are applied to the proportion of securities held in each rating category to arrive at the credit score for the portfolio. The rating on the fund is assigned on the basis of the fund's total credit score. A rated fund needs to maintain, at all times, a credit score consistent with its assigned rating. An evaluation of the portfolio investments done for the last six months indicates that Franklin India Money Market Fund has maintained its credit score consistently. The assigned rating is valid only for "Franklin India Money Market Fund". The rating of CRISIL Ratings is not an opinion of the AMC's willingness or ability to make timely payments to the investor. The rating is also not an opinion on the stability of the NAV of the Fund, which could vary with market developments.

All investments in debt funds are subject to various types of risks including credit risk, interest rate risk, liquidity risk etc. Some fixed income schemes may have a higher concentration to securities rated below AA and therefore may be exposed to relatively higher risk of downgrade or default and the associated volatility in prices which could impact NAV of the scheme. Credit rating issued by SEBI registered entities is an opinion of the rating agency and should not be considered as an assurance of repayment by issuer. There is no assurance or guarantee of principal or returns in any of the mutual fund scheme.

All investments in debt funds are subject to various types of risks including credit risk, interest rate risk, liquidity risk etc. Some fixed income schemes may have a higher concentration to securities rated below AA and therefore may be exposed to relatively higher risk of downgrade or default and the associated volatility in prices which could impact NAV of the scheme. Credit rating issued by SEBI registered entities is an opinion of the rating agency and should not be considered as an assurance of repayment by issuer. There is no assurance or guarantee of principal or returns in any of the mutual fund scheme.

This scheme has exposure to floating rate instruments. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments.

### Composition by Assets

### Composition by Rating

Please refer to page no. 57-60 for Product Label &amp; Benchmark Risk-o-meter.

All investments in debt funds are subject to various types of risks including credit risk, interest rate risk, liquidity risk etc. Some fixed income schemes may have a higher concentration to securities rated below AA and therefore may be exposed to relatively higher risk of downgrade or default and the associated volatility in prices which could impact NAV of the scheme. Credit rating issued by SEBI registered entities is an opinion of the rating agency and should not be considered as an assurance of repayment by issuer. There is no assurance or guarantee of principal or returns in any of the mutual fund scheme.

## Composition by Assets

## Composition by Rating

Please refer to page no. 57-60 for Product Label & Benchmark Risk-o-meter.

"India Ratings and Research (Ind-Ra) has assigned a credit rating of "IND AAAMfs" to "Franklin India Banking and PSU Debt Fund". Ind-Ra's Bond Fund Ratings include two measures of risk, to reflect better the risks faced by fixed-income investors. The fund credit rating measures vulnerability to losses as a result of credit defaults, and is primarily expressed by a portfolio's weighted average (WA) rating. A complementary fund volatility rating measures a portfolio's potential sensitivity to market risk factors, such as duration, spread risk, currency fluctuations and others. Credit and volatility ratings are typically assigned together. The ratings include other fund-specific risk factors that may be relevant. These risk factors include concentration risk, derivatives used for hedging or speculative purposes, leverage, and counterparty exposures. Ind-Ra assesses the fund manager's capabilities to ensure it is suitably qualified, competent and capable of managing the fund. India Ratings will not rate funds from managers that fail to pass this assessment. Ind-Ra requests monthly portfolio holdings and relevant performance statistics in order to actively monitor the ratings. Ratings do not guarantee the return profile or risk attached to the investments made. Ratings are not a recommendation or suggestion, directly or indirectly, to you or any other person, to buy, sell, make or hold any investment, loan or security or to undertake any investment strategy with respect to any investment, loan or security or any issuer. Ratings do not comment on the adequacy of market price, the suitability of any investment, loan or security for a particular investor (including without limitation, any accounting and/or regulatory treatment), or the tax-exempt nature or taxability of payments made in respect of any investment, loan or security. India Ratings is not your advisor, nor is India Ratings providing to you or any other party any financial advice, or any legal, auditing, accounting, appraisal, valuation or actuarial services. A rating should not be viewed as a replacement for such advice or services.

All investments in debt funds are subject to various types of risks including credit risk, interest rate risk, liquidity risk etc. Some fixed income schemes may have a higher concentration to securities rated below AA and therefore may be exposed to relatively higher risk of downgrade or default and the associated volatility in prices which could impact NAV of the scheme. Credit rating issued by SEBI registered entities is an opinion of the rating agency and should not be considered as an assurance of repayment by issuer. There is no assurance or guarantee of principal or returns in any of the mutual fund scheme.

## Composition by Assets

## Composition by Rating

Please refer to page no. 57-60 for Product Label & Benchmark Risk-o-meter.

All investments in debt funds are subject to various types of risks including credit risk, interest rate risk, liquidity risk etc. Some fixed income schemes may have a higher concentration to securities rated below AA and therefore may be exposed to relatively higher risk of downgrade or default and the associated volatility in prices which could impact NAV of the scheme. Credit rating issued by SEBI registered entities is an opinion of the rating agency and should not be considered as an assurance of repayment by issuer. There is no assurance or guarantee of principal or returns in any of the mutual fund scheme.

## Debt Portfolio : Composition by Rating

This scheme has exposure to floating rate instruments. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be less than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments.

Note : Sector Allocation is provided as a percentage of Equity holding totaling to 100%  
Composition by Rating is provided as a percentage of Debt Holding totaling to 100%

# Franklin India Multi-Asset Solution Fund of Funds

(Erstwhile Franklin India Multi-Asset Solution Fund)<sup>33</sup>

## FIMAS

As on April 30, 2024

### TYPE OF SCHEME

An open-ended fund of fund scheme investing in funds which in turn invest in equity, debt and gold.

# Franklin India Dynamic Asset Allocation Fund of Funds

## FIDAAF

As on April 30, 2024

### TYPE OF SCHEME

An open ended fund of fund scheme investing in dynamically balanced portfolio of equity and income funds

### SCHEME CATEGORY

FOF - Domestic

### SCHEME CHARACTERISTICS

Minimum 95% assets in the underlying funds

### INVESTMENT OBJECTIVE

The Scheme intends to generate long-term capital appreciation and income generation by investing in a dynamically managed portfolio of equity and debt mutual funds.

The equity allocation (i.e. the allocation to the equity fund(s)) will be determined based on qualitative and quantitative parameters. There can be no assurance that the investment objective of the scheme will be realized.

### DATE OF ALLOTMENT

October 31, 2003

### FUND MANAGER(S)

Rajasa Kakulavarapu

Varun Sharma (w.e.f. September 1, 2023)

### FUND SIZE (AUM)

Month End ₹ 1314.08 crores

Monthly Average ₹ 1309.68 crores

EXPENSE RATIO<sup>#</sup> : 1.40%

EXPENSE RATIO<sup>#</sup> (DIRECT) : 0.48%

<sup>#</sup> The above ratio includes the GST on Investment Management Fees. The rates specified are the actual expenses charged as at the end of the month. The above ratio also includes, proportionate charge in respect sales beyond T-30 cities subject to maximum of 30 bps on daily net assets, wherever applicable.

### LOAD STRUCTURE

ENTRY LOAD Nil

EXIT LOAD (for each purchase of Units)

In respect of each purchase of Units -

- NIL Exit load - for 10% of the units upto completion of 12 months.
- o The "First In First Out (FIFO)" logic will be applied while selecting the units for redemption
- o Waiver of Exit load is calculated for each inflow transaction separately on FIFO basis and not on the total units through multiple inflows
- o The load free units from purchases made subsequent to the initial purchase will be available only after redeeming all units from the initial purchase
- o All units redeemed/switched-out in excess of the 10% load free units will be subject to the below mentioned exit load.
- o 1.00% - if Units are redeemed/switched-out on or before 1 year from the date of allotment
- o Nil - if redeemed after 1 year from the date of allotment
- \*This no load redemption limit is applicable on a yearly basis (from the date of allotment of such units) and the limit not availed during a year shall not be clubbed or carried forward to the next year.

### Debt Portfolio : Composition by Rating

This scheme has exposure to floating rate instruments. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments.

T1: Tier-1 Index and T2: Tier-2 Index

# The Index is adjusted for the period May 18, 2006 to Feb 11, 2019 with the performance of S&P BSE 200 and for the period February 11, 2019 to August 1, 2023 with the performance of Nifty Dividend Opportunities 50. NIFTY 500 is the benchmark for TIEIF effective August 1, 2023

As TRI data is not available since inception of the scheme, benchmark performance is calculated using composite CAGR of (S&P BSE 200 PRI values from 18.05.2006 to 01.08.2006 and TRI values since 01.08.2006, S&P BSE 200 TRI values from 01.08.2006 to 11.02.2019, Nifty Dividend Opportunities 50 TRI values from 11.02.2019 to 01.08.2023 and Nifty 500 TRI since 01.08.2023)

The Fund Manager- Rajasa Kakulavarapu & Ajay Argal manages 11 (FIDAAF, FIMAS, FIDHF, FIEHF, FIESF, FIPEP, TIEIF, TIVF, FIBAF, FIETSF, FIFCF) & 5 (FBIF, FIFE, FIBCF, TIEIF, TIVF) schemes/plans respectively. The performance of other schemes managed by the fund managers are provided in the pages 47 to 51.

#The Index is adjusted for the period May 8, 2019 to April 1, 2024 with the performance of CRISIL Liquid Overnight Index. NIFTY 1D Rate Index is the benchmark for FIONF effective April 1, 2024.

**SIP returns are assuming investment made on first business day of every month. Past performance may or may not be sustained in future.** Returns greater than 1 Year period are compounded annualized. Dividends assumed to be reinvested and Bonus is adjusted. Load is not taken into consideration. On account of difference in the type/category, asset allocation or investment strategy, inception dates, performances of these funds are not strictly comparable. Please refer to [www.franklintempletonindia.com](http://www.franklintempletonindia.com) for details on performance of all schemes (including Direct Plans). **B: Benchmark, AB: Additional Benchmark**

NA : Not Applicable TRI : Total Return Index.

Please refer to the individual fund pages for the inception date of the funds in case of SIP inception returns

Please refer page 47 to 51 for complete performance disclosure of the respective schemes

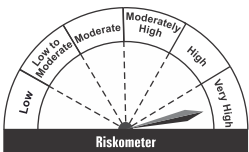

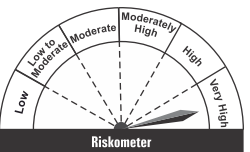

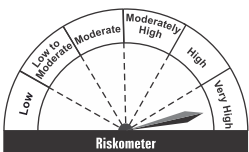

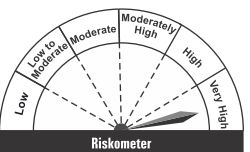

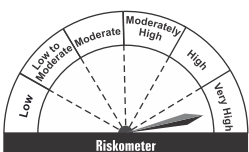

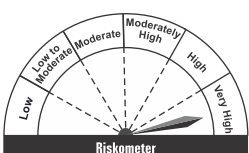

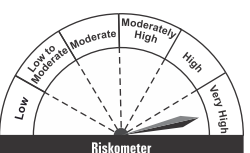

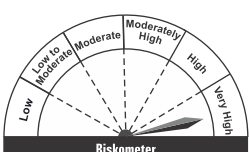

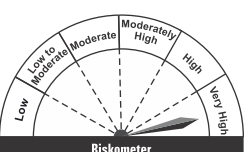

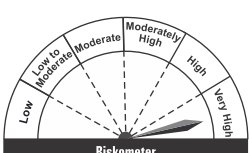

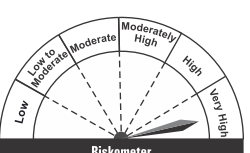

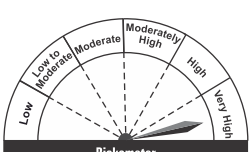

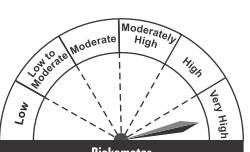

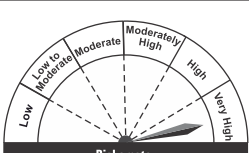

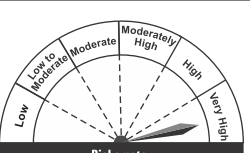

TRI : Total Return Index.

Different plans have a different expense structure

^ ^ As the scheme was launched before the launch of the benchmark index, benchmark index figures since inception are not available

# FRANKLIN TEMPLETON

**Risk Factors and Disclaimers: Mutual Fund investments are subject to market risks, read all scheme related documents carefully.** The NAVs of the schemes may go up or down depending upon the factors and forces affecting the securities market including the fluctuations in the interest rates. The past performance of the mutual funds managed by the Franklin Templeton Group and its affiliates is not necessarily indicative of future performance of the schemes. The Mutual Fund is not guaranteeing or assuring any IDCW under any of the schemes and the same is subject to the availability and adequacy of distributable surplus. The Mutual Fund is also not assuring that it will make any IDCW distributions under the IDCW plans of the schemes though it has very intention of doing so and payment of IDCW is at the sole discretion of trustees. Investments in overseas financial assets are subject to risks associated with currency movements, restrictions on repatriation, transaction procedures in overseas markets and country related risks. The expenses of the Fund of Funds scheme will be over and above the expenses charged by the underlying schemes. The existence, accuracy and performance of the Nifty 50 and S&P BSE Sensex Index will directly affect the performance of FIIF and FIDPEF, and tracking errors are inherent in any index scheme. In the event that the investible funds of more than 65% of the total proceeds of the scheme/plan are not invested in equity shares of domestic companies, then the scheme/plan TIEIF & FIBF may not qualify as equity oriented fund (as per current tax laws). All subscriptions in FIT are subject to a lock-in period of 3 years from the date of allotment and the unitholder cannot redeem, transfer, assign or pledge the units during this period. All subscriptions in FIPEP are locked in for a period of 3 full financial years. The Trustee, AMC, their directors or their employees shall not be liable for any of the tax consequences that may arise, in the event that the schemes are wound up before the completion of the lock-in period. Investors are requested to review the prospectus carefully and obtain expert professional advice with regard to specific legal, tax and financial implications of the investment/participation in the scheme.
