\$ Concept of Macaulay's Duration

The **Macaulay duration** is defined as the weighted average time to full recovery of principal and interest payments of a bond i.e. the weighted average maturity of cash flows. The weight of each cash flow is determined by dividing the present value of the cash flow by the price of the bond. It is computed as follows:

$$\text{Macaulay Duration} = \sum_{t=1}^n \frac{(\text{PV})(\text{CF}_t) \times t}{\text{Market Price of Bond}}$$

(PV)(CF_t) = present value of cash flows of a bond at period t

t = time to each cash flow (in years)

n = number of periods to maturity

Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. SEBI vide letter dated November 3, 2021 has clarified that Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government Securities.

The scheme shall maintain liquid assets in the form of Redemption at Risk (LR-RaR) and Conditional Redemption at Risk (LR-CRaR) which shall be atleast 10% of their net assets of the scheme or as prescribed at Annexure 1 of AMFI Best Practices Guidelines Circular No.93 / 2021-22 dated July 24, 2021, whichever is higher. The schemes shall maintain the above two ratios at 100% of the requirement on a daily basis. However, to meet redemptions, AMCs may have to periodically dip into their liquid assets which may result in the liquidity ratio dropping below 100% on those days. To factor in such scenarios, the scheme shall ensure that the ratio is restored to 100% of the requirement by ensuring the net inflows (through net subscription/accruals/ maturity & sale proceeds) into the scheme are used for restoring the ratios before making new purchases outside 'Eligible Assets'. In case the ratio remains below 100% for more than 15 consecutive days, then, this information shall be highlighted to Trustees till such time the said ratio is not restored to 100% of the requirement on weekly basis. In respect to asset allocation limits as provided in above table, the base shall be considered as net assets excluding the extent of minimum stipulated eligible assets i.e. higher of 10% of net assets or LR-CRaR as prescribed at Annexure 1 of AMFI Best Practices Guidelines Circular No.93 / 2021-22 dated July 24, 2021.

It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially (subject to and within the maximum limits prescribed above) depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the Unit holders. The asset allocation pattern described above may alter from time to time on a short-term basis on defensive considerations (As per Para 1.14.1.2.b of SEBI Master circular on Mutual Funds dated June 27, 2024), keeping in view market conditions, market opportunities, applicable regulations and political and economic factors (i.e., for reasons other than downgrade in rating) and would, in such cases, shall be rebalanced within 30 calendar days from date of deviation. However, if the asset allocation pattern is to be altered for other reasons, as this is a fundamental attribute, the procedure outlined in the paragraph on fundamental attributes below, shall be followed.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with Chapter 16A of SEBI Master Circular on

	<p>Mutual Funds dated June 27, 2024 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.</p> <p>However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.</p> <p>Further, investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.</p> <p>Portfolio rebalancing:</p> <p>In the event of deviations, the portfolio will be rebalanced as per Para 2.9 of SEBI Master Circular on Mutual Funds dated June 27, 2024. In the event of deviation from mandated asset allocation mentioned in the Scheme Information Document (SID) due to passive breaches (occurrence of instances not arising out of omission and commission of AMCs), rebalancing period shall be 30 Business Days. Where the portfolio is not rebalanced within 30 Business Days justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment committee shall then decide on the course of action. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of the mandated rebalancing period. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.</p> <p>As per Para 2.9 of SEBI Master Circular on Mutual Funds dated June 27, 2024 all the reporting and disclosure requirements shall be complied with. This includes disclosure to investors in case the AUM of deviated portfolio is more than 10% of the AUM of main portfolio of scheme.</p> <p>In accordance with Para 4.6 of SEBI Master Circular on Mutual Funds dated June 27, 2024, the scheme shall hold at least 10% of their net assets in liquid assets. For this purpose, 'liquid assets' shall include Cash, Government Securities, T-bills and Repo on Government Securities. Such investment shall not be included for determining the scheme characteristics as specified</p>
--	---

	in Part IV of SEBI Master Circular on Mutual Funds dated June 27, 2024. In case, the exposure in such liquid assets / securities falls below the SEBI prescribed threshold, the AMC shall ensure compliance with the above requirement before making any further investments.
Investment Strategy	To achieve its investment objective of generating medium to long term capital appreciation with income by investing in debt and money market instruments such that Portfolio Macaulay duration is between 4 to 7 years. The portfolio will be actively managed to generate income while aiming to achieve an optimal balance between yield, safety and liquidity.
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <ul style="list-style-type: none"> • Different types of securities in which the scheme would invest carry different levels and types of risks. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. • Investments in debt instruments are subject to various risks such as credit/default risk, interest rate risk, reinvestment risk, liquidity risk etc. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated. • Credit Risk: This refers to the risk that an issuer of a fixed income security may default (i.e. will be unable to make timely principal and interest payments on the security). • Interest Rate Risk: This risk results from changes in demand and supply for money and other macroeconomic factors and creates price changes in the value of debt instruments. Consequently, the NAV of the scheme may be subject to fluctuation. Prices of long term securities generally fluctuate more in response to interest rate changes than do short-term Securities. This may expose the schemes to possible capital erosion. • Liquidity Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). Liquidity risk is today characteristic of the Indian fixed income market. • Market Risk: This risk arises due to price volatility due to such factors as interest sensitivity, market perception or the credit worthiness of the issuer and general market liquidity, change in interest rate expectations and liquidity flows. Market risk is a risk which is inherent to investments in securities. This may expose the schemes to possible capital erosion. • Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received for the securities in the Scheme is reinvested. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed. • Different types of Securitised Debts in which the scheme would invest carry different levels and types of risks. Presently, secondary market for securitised papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. Money market

	<p>securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the scheme.</p> <ul style="list-style-type: none"> • Engaging in securities lending is subject to risks related to fluctuations in collateral value and settlement/liquidity and counter party risks. • Short selling of securities (i.e. sale of securities without owning them) entails the risk of the security price going up there by decreasing the profitability of the short position. • Derivatives are high risk, high return instruments as they may be highly leveraged. A small price movement in the underlying security could have a large impact on their value and may also result in a loss. • There is no assurance or guarantee that the objectives of the scheme will be achieved. The past performance of the mutual funds managed by the Franklin Templeton Group and its affiliates is not necessarily indicative of future performance of the scheme. <p>For details on risk factors and risk mitigation measures, please refer SID.</p>
