Concept of Macaulay’s Duration

The **Macaulay duration** is defined as the weighted average time to full recovery of principal and interest payments of a bond i.e. the weighted average maturity of cash flows. The weight of each cash flow is determined by dividing the present value of the cash flow by the price of the bond. It is computed as follows:

$$\text{Macaulay Duration} = \sum_{t=1}^n \frac{(PV) (CF_t) \times t}{\text{Market Price of Bond}}$$

(PV)(CF_t) = present value of cash flows of a bond at period t

t = time to each cash flow (in years)

n = number of periods to maturity

Currently it is mandatory for all investors irrespective of amount of investment (including joint holders, NRIs, POA holders and guardians in the case of minors) to submit a copy of the KYC acknowledgement towards completion of Know Your Customers (KYC) policies under the AML Laws.

Central KYC Registry (CKYCR) is a centralized repository of KYC records of customers in the financial sector with uniform KYC norms and inter-usability of the KYC records across the sector with an objective to reduce the burden of producing KYC documents and getting those verified every time when the customer creates a new relationship with a financial entity. With effect from February 1, 2017, individual investors whose KYC is not registered or verified in the KYC Registration Agency (KRA) system should use "CKYC Form". In case such investor provides the old KRA KYC form, additional/missing information must be provided in a "Supplementary CKYC Form". Investors who have already completed Centralised KYC (CKYC) and have a KYC Identification Number (KIN) from CKYCR may quote their 14 digit KIN in the application form. If PAN of such investors is not updated in CKYC system, investors need to submit a self-certified copy of the PAN card.

Applications without such documents and information may be rejected.

- For applications by minors, copy of KYC Acknowledgement of the guardian must be submitted along with the Application / Transaction Form else the application may be rejected
- In case of applications under a Power of Attorney (POA), copy of KYC Acknowledgement of the investors and the POA holders must be submitted along with the Application / Transaction Form else the transaction may be rejected
- In case of subscriptions in scheme where Units are under a lock- in period as prescribed in the respective Scheme Information Documents (including ELSS Schemes) or a New Fund Offer, allotment may be done only on confirmation from the CVL/KRA that the KYC is final and if the CVL/KRA informs that the KYC is cancelled, the original amount invested may be refunded.
- In case of any transactions where the KYC formalities are completed for the investors in the folio, and a change of address is also requested, the transaction will be processed based on the current data available in the AMC / RTA records and the change of address will be rejected. Changes of address can only be registered through updation of KYC records via CKYC & KRA.
- As per the SEBI guidelines, the investors need to complete the In Person Verification (IPV) as part of the KYC requirements. Politically Exposed Persons (PEP) are defined as individuals who are or have been entrusted with prominent public functions in a foreign country, e.g., Heads of States or of Governments, senior politicians, senior Government / judicial/ military officers, senior executives of state owned corporations, important political party officials, etc. or any senior political figures and their immediate family members and close associates.

In the event of any KYC Application being subsequently rejected for lack of information / deficiency / insufficiency of mandatory documentation, the investment transaction may be cancelled and the amount may be redeemed at applicable NAV, subject to payment of exit load, wherever applicable. Such redemption proceeds will be dispatched within a maximum period of 21 days from date of acceptance of application. In case of subscriptions in scheme where Units are under a lock - in period as prescribed in the respective Scheme Information Documents (including ELSS Schemes) or a New Fund Offer, allotment may be done only on confirmation from the central agency that the KYC is final and if the central agency informs that the KYC is cancelled, the original amount invested may be refunded.

For Investors who have submitted their KYC acknowledgement, changes as listed below must be requested through updation of KYC records.

- Change of address
- Name change
- Any other information provided in KYC form

Any direct requests for the above for folios where the KYC acknowledgement is registered with us will be rejected. The address for a folio will be the 1st holder's/1st Guardian's address for communication. This address will be printed in the account statement and considered for all other communications.

Change of Address for investors who have submitted their KYC acknowledgement with us will be effected into all folios where the investor is the first holder or 1st guardian. If the investor has not registered their KYC acknowledgement with us, the change of address request will be effected only for the particular folio(s) requested by the investor. Such request needs to be accompanied with the proof of address and proof of identity. If PAN is updated and verified in our records, only PAN card copy would be accepted as proof of identity. If PAN is not updated and verified in our records, PAN card copy or any other proof of identity (bearing photo) is acceptable. When investors submit their KYC acknowledgement for an existing folio, all existing details of the holder(s) will be overwritten with the details available in the records of CVL.

Once the name change is effected at KRA, Investor has to submit a request letter along with the requisite documents. Post receipt of documents from the investor and after verification with KRA, Franklin Templeton would carry out the change of name request.

18. Default Options:

The following defaults will apply to the processing of applications, where required, in addition to the defaults already mentioned in the

The fund managers will adopt a combination of top-down (macro analysis to identify sectors) and bottom-up (micro analysis to pick stocks within these sectors) approach, with an emphasis on first-hand research. They will favour companies that offer the best value relative to their respective long-term growth prospects, returns in capital and management quality. The dedicated fund manager who is assisting the Principal Fund Manager would carry out the research on foreign securities and send an approved list of international securities/stocks once a week having following details: Name of the Company, Sector, Place of Issue, Type of security, Maximum weightage, price range. The trades would be placed by the Principal Fund Manager or any other member of the team authorised for that purpose in accordance with the approved list and for the period contemplated in the approved list. Further the trades would be executed by Global Equity Trading Team network, which also includes equity trading function based in Chennai (India).

The holdings, asset allocation, and performance of the schemes are presented to the boards of AMC/Trustee at frequent intervals. Investment in securities from a scheme's corpus would be only in transferable securities in accordance with Regulation 43 of Chapter VI of SEBI (Mutual Funds) Regulations, 1996 (including any modifications thereto). The fund managers will follow an active investment strategy taking defensive/aggressive postures depending on opportunities available at various points in time. Investments in Foreign Securities shall be subject to the investment restrictions specified by SEBI/RBI from time to time. Further, the fund manager will consider relevant risk before making any investment in Foreign Securities.

INVESTMENT STRATEGY

The scheme seeks to invest predominantly in units of Franklin U.S. Opportunities Fund, an overseas mutual fund, which primarily invest in securities in the United States of America.

Mutual Fund schemes can be of two types viz. actively managed and passively managed. An actively managed scheme would try and beat the returns generated by a given market by employing sophisticated research tools, actively trading a portfolio etc. All these translate to higher cost of managing the fund - but do not necessarily guarantee out performance - especially over the long term. On the other hand, a passively managed scheme like this master feeder fund would invest in the overseas mutual funds / unit trusts within the investment pattern allowing Indian investor to diversify his / her risk from a single country and single currency investment. The investment made in the underlying fund will be based on the subscriptions and redemptions received in the Scheme and within the overall limits specified by SEBI/RBI.

The Scheme currently proposes to invest in units of Franklin U.S. Opportunities Fund, an international Franklin Templeton SICAV range mutual fund (domiciled in Luxembourg) that invests in securities in the United States of America.

The benchmark used for Franklin U.S. Opportunities Equity Active Fund of Funds is Russell 3000 Growth Index, which will be followed for FUSOF also after converting it to Indian Rupee.

The FUSOF may not be able to mirror the performance of underlying overseas fund(s) due to various reasons such as currency difference between FUSOF and underlying fund, daily revaluation of foreign exchange in FUSOF for the portfolio valuation, entire assets of FUSOF may not be invested in underlying fund, the amount payable/receivable on settlement date would be different as compared to the amount payable/receivable on the trade confirmation date of the investment in the FUSOF / underlying fund due to foreign exchange movement, difference in the date of allotment of units in FUSOF and the investment by FUSOF into the underlying fund etc.

For local (domestic) investments

The main aim of the investment process is to meet Fund specific investment objectives and to develop a well-diversified, high credit portfolio that minimises liquidity risk and credit risk. The performance review includes portfolio holding, peer group review, policy deviation, performance vis-à-vis peers and benchmark indices etc. The Investment process is intensely research oriented. It comprises of qualitative as well as quantitative measures.

The fund manager shall have the option to enter into forward contracts for the purposes of hedging against the foreign exchange fluctuations.

INVESTMENT STRATEGY

Franklin India Feeder - Templeton European Opportunities Fund is an open-end passively managed fund investing predominantly in units of Templeton European Opportunities Fund, an overseas equity fund which primarily invest in securities of issuers incorporated or having their principal business activities in European countries.

Mutual Fund schemes can be of two types viz. actively managed and passively managed. An actively managed scheme would try and beat the returns generated by a given market by employing sophisticated research tools, actively trading a portfolio etc. All these translate to higher cost of managing the fund - but do not necessarily guarantee out performance - especially over the long term. On the other hand, a passively managed scheme like this master feeder fund would invest in the overseas mutual funds / unit trusts within the investment pattern allowing Indian investor to diversify his / her risk from a single country and single currency investment. The investment made in the underlying fund will be based on the subscriptions and redemptions received in the Scheme and within the overall limits specified by SEBI/RBI.

The Scheme currently proposes to invest in units of Templeton European Opportunities Fund, an international Franklin Templeton SICAV range mutual fund (domiciled in Luxembourg) that invests in securities of issuers incorporated or having their principal business activities in European countries.

The benchmark used for Templeton European Opportunities Fund is MSCI Europe Index, which will be followed for FIF-TEOF also after converting it Indian Rupee.

The FIF-TEOF may not be able to mirror the performance of underlying overseas fund due to various reasons such as currency difference between FIF-TEOF and underlying fund, daily revaluation of foreign exchange in FIF-TEOF for the portfolio valuation, entire assets of FIF-TEOF may not be invested in underlying fund, the amount payable/receivable on settlement date would be different as compared to the amount payable/receivable on the trade confirmation date of the investment in the FIF-TEOF / underlying fund due to foreign exchange movement, difference in the date of allotment of units in FIF-TEOF and the investment by FIF-TEOF into the underlying fund etc.

For local (domestic) investments

The main aim of the investment process is to meet Fund specific investment objectives and to develop a well-diversified, high credit portfolio that minimises liquidity risk and credit risk. The performance review includes portfolio holding, peer group review, policy deviation, performance vis-à-vis peers and benchmark indices etc. The Investment process is intensely research oriented. It comprises of qualitative as well as quantitative measures.

The fund manager shall have the option to enter into forward contracts for the purposes of hedging against the foreign exchange fluctuations.

Determination of asset allocation:

A mix of quantitative and qualitative factors will be used to determine equity asset allocation. Quantitative parameter: This will be determined based on the month-end weighted average P/E ratio and P/B ratio of the Nifty 500 Index, combined in the weightage of 50:50 ratio. As per the ratio bands, the corresponding equity allocation will be identified for both P/E and P/B. These allocations will be accorded 50% weightage each and added to arrive at the final equity allocation based on quantitative parameters for the month.

Price to Equity band-based allocation:

If weighted average PE ratio of Nifty 500 Index falls in this band...	...the equity component will be...(%)	...and the debt component will be...(%)
Upto 12	80-85	15-20
12 – 16	67.5-80	20-32.5
16 – 20	55-67.5	32.5-45
20 – 24	42.5-55	45-57.5
24 – 28	30-42.5	57.5-70
Above 28	20-30	70-80

Price to Book Value band-based allocation:

If weighted average PB ratio of the Nifty 500 Index falls in this band...	...the equity component will be...(%)	...and the debt component will be...(%)
Upto 2	80-85	15-20
2 – 3	63-80	20-37
3 – 4	47-63	37-53
4 – 5	30-47	53-70
Above 5	20-30	70-80

The Trustee reserves the right to change the P/E ratio and P/B ratio bands or use any other criteria for determining the equity/debt allocation if the Nifty 500 Index is either suspended or becomes irrelevant, subject to prior approval of SEBI.

Calculation of P/E and P/B ratios:

The Price to Earnings Ratio (P/E ratio) and Price to Book Value Ratio (P/B ratio) for Nifty 500 Index will be obtained from renowned sources such as Bloomberg or a reputed agency such as NSE Indices Limited (Formerly known as India Index Services & Products Limited - IISL) or an internationally recognized brokerage house, computed using well accepted methods. Data from the most recent reporting period (quarterly/ semi-annual/ annual) will be used in the calculation. In exceptional circumstances and for reasons recorded in writing, the AMC/Trustee reserves the right to recalculate or make necessary adjustments to P/E and P/B ratio provided by external vendors.

Qualitative parameters: After determination of quantitative parameter-based equity allocation, fund manager will apply his/her qualitative analysis by incorporating factors such as macro trends, interest rates, risk environment etc. Dynamic asset allocation views will be driven by research input derived from a combination of some or all of the following:

- economic regime models,
- aggregate corporate fundamentals and
- valuation models,
- market liquidity models and
- analyst assessments of policy backdrops.

Fund manager can decide allocation to equity component which may be +/- 15% from the band specified in the table above subject to overall asset allocation limits for each asset class. The portfolio will be realigned at least once a month, generally in the first week of the following month.

Illustration of Asset allocation using P/E and P/B bands:

If Nifty 500 Index weighted average P/E as on 30th April stands at 28x, the corresponding equity allocation as per the band will be, say, 30%.

If Nifty 500 Index weighted average P/B as on 30th April stands at 2.7x, the corresponding equity allocation as per the band will be, say, 72%.

50% weight will be applied to 30% (P/E based allocation) and 50% weight to 72% (P/B based allocation) to arrive at a combined weighted average equity allocation of 51%. Debt allocation will constitute the balance of 49%.

The equity allocation level of 51% thus obtained from quantitative model is further subject to modification by the fund manager to the extent of +/- 15% based on his/ her qualitative analysis.

It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially (subject to and within the maximum limits prescribed above) depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the Unit holders. The asset allocation pattern described above may alter from time to time on a short-term basis on defensive considerations (As per Para 1.14.1.2.b of SEBI Master circular on Mutual Funds dated June 27, 2024), keeping in view market conditions, market opportunities, applicable regulations and political and economic factors (i.e., for reasons other than downgrade in rating) and would, in

such cases, shall be rebalanced within 30 calendar days from date of deviation. However, if the asset allocation pattern is to be altered for other reasons, as this is a fundamental attribute, the procedure outlined in the paragraph on fundamental attributes below, shall be followed.

Portfolio Rebalancing

In the event of deviations the portfolio will be rebalanced as per Para 2.9 of SEBI Master Circular on Mutual Funds dated June 27, 2024. In the event of deviation from mandated asset allocation mentioned in the Scheme Information Document (SID) due to passive breaches (occurrence of instances not arising out of omission and commission of AMCs), rebalancing period shall be 30 Business Days. The Investment committee shall then decide on the course of action. The Investment Committee, if so desires, can extend the timelines up to sixty (60) Business Days from the date of completion of mandated rebalancing period. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.

All the reporting and disclosure requirements as mentioned in Para 2.9 of SEBI Master Circular on Mutual Funds dated June 27, 2024 shall be complied with. This includes disclosure to investors in case the AUM of deviated portfolio is more than 10% of the AUM of main portfolio of scheme.

TEMPORARY INVESTMENTS: When the Fund Managers believes market or economic conditions are unfavourable for investors, the scheme may invest up to 100% of the Fund's assets in a temporary defensive manner by holding all or a substantial portion of its assets in cash, cash equivalents or other high quality short-term investments. Temporary defensive investments generally may include commercial paper, bank obligations, repurchase agreements and other approved money market instruments, including Mibor/call linked instruments, fixed deposits of banks etc. The manager also may invest in these types of securities or hold cash while looking for suitable investment opportunities or to maintain liquidity. In these circumstances, the Fund may be unable to achieve its investment goal. As per Para 1.14.1.2.b of SEBI Master circular on Mutual Funds dated June 27, 2024 such changes in the investment pattern will be for short term and for defensive considerations only and shall be rebalanced within 30 calendar days from date of deviation.

The fund manager reserves the right to alter the above-mentioned indicators or use any other criteria to use suitable indicators in case any of the above factors are either not available or modified or becomes irrelevant.

INVESTMENT STRATEGY

The scheme endeavours to provide long term capital appreciation and income from a mix of equity and debt investments. The scheme will dynamically allocate its net assets between equity and equity related instruments and debt instruments based on a combination of qualitative and quantitative parameters. The scheme will seek to manage net equity exposure by actively using derivatives for the purpose of hedging and balancing the portfolio.

Further, the scheme may invest into equity stocks in the cash market and take short position in futures market to reduce net long equity exposure.

Determination of asset allocation:

A mix of quantitative and qualitative factors will be used to determine equity asset allocation. As per the ratio bands, the corresponding equity allocation will be identified for both P/E and P/B. These allocations will be accorded 50% weightage each and added to arrive at the final equity allocation based on quantitative parameters for the month.

Price to Equity band-based allocation:

If weighted average PE ratio of Nifty 500 Index falls in this band...	...the equity component will be...(%)	...and the debt component will be...(%)
Upto 12	80-	8515-20
12 – 16	67.5-80	20-32.5
16 – 20	55-67.5	32.5-45
20 – 24	42.5-55	45-57.5
24 – 28	30-42.5	57.5-70
Above 28	15-30	70-85

Price to Book Value band-based allocation:

If weighted average PB ratio of the Nifty 500 Index falls in this band...	...the equity component will be...(%)	...and the debt component will be...(%)
Upto 2	80-85	15-20
2 – 3	63-80	20-37
3 – 4	47-63	37-53
4 – 5	30-47	53-70
Above 5	15-30	70-85

The Trustee reserves the right to change the P/E ratio and P/B ratio bands or use any other criteria for determining the equity/debt allocation if the Nifty 500 Index is either suspended or becomes irrelevant.

Calculation of P/E and P/B ratios:

The Price to Earnings Ratio (P/E ratio) and Price to Book Value Ratio (P/B ratio) for Nifty 500 Index will be obtained from renowned sources such as Bloomberg or a reputed agency such as IISL or an internationally recognized brokerage house, computed using well accepted methods. Data from the most recent reporting period (quarterly/semi-annual/annual) will be used in the calculation. In exceptional circumstances and for reasons recorded in writing, the AMC reserves the right to recalculate or make necessary adjustments to P/E and P/B ratio provided by external vendors.

Qualitative parameters: After determination of quantitative parameter-based equity allocation, fund manager will apply his/her qualitative analysis by incorporating factors such as macro trends, interest rates, risk environment etc. Dynamic asset allocation views will be driven by research input derived from a combination of some or all of the following:

- economic regime models,
- aggregate corporate fundamentals and
- valuation models,
- market liquidity models and
- analyst assessments of policy backdrops.

Fund manager can decide allocation to equity component which may be +/- 15% from the band specified in the table above subject to overall asset allocation limits for each asset class. The portfolio will be rebalanced in the first week of the following month.

Illustration of Asset allocation using P/E and P/B bands:

If Nifty 500 Index weighted average P/E as on 30th April stands at 28x, the corresponding equity allocation as per the band will be, say, 30%.

If Nifty 500 Index weighted average P/B as on 30th April stands at 2.7x, the corresponding equity allocation as per the band will be, say, 72%.

50% weight will be applied to 30% (P/E based allocation) and 50% weight to 72% (P/B based allocation) to arrive at a combined weighted average equity allocation of 51%. Debt allocation will constitute the balance of 49%.

The equity allocation level of 51% thus obtained from quantitative model is further subject to modification by the fund manager to the extent of +/- 15% based on his/ her qualitative analysis.

Dynamic modification in Asset Allocation

Subject to applicable laws, the Investment Manager may make appropriate modification in the asset allocation basis market conditions, market opportunities, applicable regulations, political and economic factors etc. While the fund endeavors to have a minimum 65 percentage of total proceeds (computed as per tax laws) of the fund invested in the equity shares of domestic companies listed on a recognized Stock Exchange, the fund may use derivatives for hedging purpose and at times, the effective economic exposure to the equity shares may fall below 65%.

For example;

Instruments % to Net Assets

Equity Shares of Domestic Companies Listed on recognized Stock Exchange 65%

Hedging/Short position in equity derivatives (-10%)

Effective Economic Exposure 55%

- Equity portion management
The strategy for managing the equity portion will be unconstrained with respect to investment in stocks across market capitalizations.
- Fixed income portion management
Fixed income investment will be made in investment grade instruments across government, corporate, PSUs, NBFCs, Banks and other issuers.
- Derivatives portion management
The fund may use derivative instruments for the purpose of hedging and balancing the portfolio. The hedging instruments will be used as a tool to balance the portfolio and not to generate alpha.

The Scheme may use derivatives for such purposes as may be permitted by the Regulations, including for the purpose of hedging and portfolio balancing, based on the opportunities available and subject to guidelines issued by SEBI from time to time.

The margin money deployed on derivative positions would be included in Debt & Money Market Instruments. The cumulative gross exposure through equity, debt and derivative positions shall not exceed 100% of the net assets of the scheme.

For detailed derivative strategies, please refer to SAI.

It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially (subject to and within the maximum limits prescribed above) depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the Unit holders. The asset allocation pattern described above may alter from time to time on a short-term basis on defensive considerations (As per Para 1.14.1.2.b of SEBI Master circular on Mutual Funds dated June 27, 2024), keeping in view market conditions, market opportunities, applicable regulations and political and economic factors (i.e., for reasons other than downgrade in rating) and would, in such cases, shall be rebalanced within 30 calendar days from date of deviation. Portfolio Rebalancing

In the event of deviations the portfolio will be rebalanced as per Para 2.9 of SEBI Master Circular on Mutual Funds dated June 27, 2024. Where the portfolio is not rebalanced within 30 Business Days justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment committee shall then decide on

the course of action. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.

All the reporting and disclosure requirements as mentioned in Para 2.9 of SEBI Master Circular on Mutual Funds dated June 27, 2024 shall be complied with. This includes disclosure to investors in case the AUM of deviated portfolio is more than 10% of the AUM of main portfolio of scheme.

INVESTMENT STRATEGY

The primary objective of the scheme is to invest actively in arbitrage opportunities between spot and futures prices of exchange traded equities and other potential arbitrage opportunities available within the derivative segment and cash segment. The market provides opportunities to the investor to derive returns from the implied cost of carry between the underlying cash market and the derivatives market. This provides opportunities to generate returns that are possibly higher than short term interest rates with minimal active price risk on equities. Implied cost of carry and spreads across the spot, futures and options markets can potentially lead to profitable arbitrage opportunities. The Scheme would carry out arbitrage strategies, which would entail taking offsetting positions in the various markets simultaneously. As arbitrage opportunities are dependent on ensuing market conditions, there will be a part of the portfolio, which will be invested in debt securities and money market securities. This component of the portfolio will provide the necessary liquidity to meet redemption needs and other liquidity requirements of the Scheme.

The scheme shall maintain liquid assets in the form of Redemption at Risk (LR-RaR) and Conditional Redemption at Risk (LR-CRaR) which shall be at least 10% of their net assets of the scheme or as prescribed at Annexure 1 of AMFI Best Practices Guidelines Circular No.93/2021-22 dated July 24, 2021, whichever is higher. The schemes shall maintain the above two ratios at 100% of the requirement on a daily basis. However, to meet redemptions, AMCs may have to periodically dip into their liquid assets which may result in the liquidity ratio dropping below 100% on those days. To factor in such scenarios, the scheme shall ensure that the ratio is restored to 100% of the requirement by ensuring the net inflows (through net subscription/accruals/ maturity & sale proceeds) into the scheme are used for restoring the ratios before making new purchases outside 'Eligible Assets'. In case the ratio remains below 100% for more than 15 consecutive days, then, this information shall be highlighted to Trustees till such time the said ratio is not restored to 100% of the requirement on weekly basis. In respect to asset allocation limits as provided in above table, the base shall be considered as net assets excluding the extent of minimum stipulated eligible assets i.e. higher of 10% of net assets or LR-CRaR as prescribed at Annexure 1 of AMFI Best Practices Guidelines Circular No.93/2021-22 dated July 24, 2021.

It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially (subject to and within the maximum limits prescribed above) depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the Unit holders. The asset allocation pattern described above may alter from time to time on a short-term basis on defensive considerations (As per Para 1.14.1.2.b of SEBI Master circular on Mutual Funds dated June 27, 2024), keeping in view market conditions, market opportunities, applicable regulations and political and economic factors (i.e., for reasons other than downgrade in rating) and would, in such cases, shall be rebalanced within 30 calendar days from date of deviation. However, if the asset allocation pattern is to be altered for other reasons, as this is a fundamental attribute, the procedure outlined in the paragraph on fundamental attributes below, shall be followed.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with Chapter 16A of SEBI Master Circular for Mutual Funds dated June 27, 2024 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM

decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.

Further, investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Portfolio rebalancing:

In the event of deviations, the portfolio will be rebalanced as per Para 2.9 of SEBI Master Circular on Mutual Funds dated June 27, 2024. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. SEBI vide letter dated November 3, 2021 has clarified that Cash Equivalent shall consist of Government Securities, T-Bills and Repo on Government Securities.

The scheme shall maintain liquid assets in the form of Redemption at Risk (LR-RaR) and Conditional Redemption at Risk (LR-CRaR) which shall be atleast 10% of their net assets of the scheme or as prescribed at Annexure 1 of AMFI Best Practices Guidelines Circular No.93/ 2021-22 dated July 24, 2021, whichever is higher. The schemes shall maintain the above two ratios at 100% of the requirement on a daily basis. However, to meet redemptions, AMCs may have to periodically dip into their liquid assets which may result in the liquidity ratio dropping below 100% on those days. To factor in such scenarios, the scheme shall ensure that the ratio is restored to 100% of the requirement by ensuring the net inflows (through net subscription/accruals/ maturity & sale proceeds) into the scheme are used for restoring the ratios before making new purchases outside 'Eligible Assets'. In case the ratio remains below 100% for more than 15 consecutive days, then, this information shall be highlighted to Trustees till such time the said ratio is not restored to 100% of the requirement on weekly basis. In respect to asset allocation limits as provided in above table, the base shall be considered as net assets excluding the extent of minimum stipulated eligible assets i.e. higher of 10% of net assets or LR-CRaR as prescribed at Annexure 1 of AMFI Best Practices Guidelines Circular No.93/2021-22 dated July 24, 2021.

It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially (subject to and within the maximum limits prescribed above) depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the Unit holders. The asset allocation pattern described above may alter from time to time on a short-term basis on defensive considerations (As per Para 1.14.1.2.b of SEBI Master circular on Mutual Funds dated June 27, 2024), keeping in view market conditions, market opportunities, applicable regulations and political and economic factors (i.e., for reasons other than downgrade in rating) and would, in such cases, shall be rebalanced within 30 calendar days from date of deviation. However, if the asset allocation pattern is to be altered for other reasons, as this is a fundamental attribute, the procedure outlined in the paragraph on fundamental attributes below, shall be followed.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with Chapter 16A of SEBI Master Circular on Mutual Funds dated June 27, 2024 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.

Further, investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Portfolio rebalancing:

In the event of deviations, the portfolio will be rebalanced as per Para 2.9 of SEBI Master Circular on Mutual Funds dated June 27, 2024. In the event of deviation from mandated asset allocation mentioned in the Scheme Information Document (SID) due to passive breaches (occurrence of instances not arising out of omission and commission of AMCs), rebalancing period shall be 30 Business Days. Where the portfolio is not rebalanced within 30 Business Days justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment committee shall then decide on the course of action. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of the mandated rebalancing period. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.

As per Para 2.9 of SEBI Master Circular on Mutual Funds dated June 27, 2024 all the reporting and disclosure requirements shall be complied with. This includes disclosure to investors in case the AUM of deviated portfolio is more than 10% of the AUM of main portfolio of scheme.

In accordance with Para 4.6 of SEBI Master Circular on Mutual Funds dated June 27, 2024, the scheme shall hold at least 10% of their net assets in liquid assets. For this purpose, 'liquid assets' shall include Cash, Government Securities, T-bills and Repo on Government Securities. Such investment shall not be included for determining the scheme characteristics as specified in Part IV of SEBI Master Circular on Mutual Funds dated June 27, 2024. In case, the exposure in such liquid assets / securities falls below the SEBI prescribed threshold, the AMC shall ensure compliance with the above requirement before making any further investments.

It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially (subject to and within the maximum limits prescribed above) depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the Unit holders. The asset allocation pattern described above may alter from time to time on a short-term basis on defensive considerations (As per Para 1.14.1.2.b of SEBI Master circular on Mutual Funds dated June 28,

2024), keeping in view market conditions, market opportunities, applicable regulations and political and economic factors (i.e., for reasons other than downgrade in rating) and would, in such cases, shall be rebalanced within 30 calendar days from date of deviation. However, if the asset allocation pattern is to be altered for other reasons, as this is a fundamental attribute, the procedure outlined in the paragraph on fundamental attributes below, shall be followed.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with Chapter 16A of SEBI Master Circular for Mutual Funds dated June 27, 2024 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.

Further, investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Portfolio rebalancing:

In the event of deviations, the portfolio will be rebalanced as per Para 2.9 of SEBI Master Circular on Mutual Funds dated May 19, 2023. In the event of deviation from mandated asset allocation mentioned in the Scheme Information Document (SID) due to passive breaches (occurrence of instances not arising out of omission and commission of AMCs), rebalancing period shall be 30 Business Days. Where the portfolio is not rebalanced within 30 Business Days justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment committee shall then decide on the course of action. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of the mandated rebalancing period. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.

As per Para 2.9 of SEBI Master Circular on Mutual Funds dated May 19, 2023 all the reporting and disclosure requirements shall be complied with. This includes disclosure to investors in case the AUM of deviated portfolio is more than 10% of the AUM of main portfolio of scheme.

INVESTMENT STRATEGY

To achieve the investment objective of generating returns in the fixed income market by actively managing the portfolio while maintaining a low duration. The scheme will invest in Debt & Money Market instruments such that the Macaulay duration of the portfolio is between 6 months and 12 months.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

For detailed derivative strategies, please refer to SAI.

Risk Profile of the Schemes

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Different types of securities in which the scheme would invest carry different levels and types of risks. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern.

Trading volumes, settlement periods and transfer procedures may restrict liquidity of investments in equity and equity-related securities.

In case of investments in foreign securities, there may be risks associated with currency movements, restrictions on repatriation and transaction procedures in overseas market as well as country related risks.

Performance of the relevant index will have a direct bearing on the performance of the index schemes. Tracking errors are inherent in any indexed fund and such errors may cause the scheme to generate returns, which are not in line with the performance of the relevant index or one or more securities covered by/included in the relevant index.

In case of sector funds, the schemes would primarily invest in the respective industry / sector thereby restricting the diversification of the scheme. Therefore, the performance of the scheme would be dependent upon the performance and market price movements of companies in the said industry/sector. Hence, movements in the NAV of the schemes would be more volatile compared to the NAV of a scheme with a more diversified portfolio.

In case of FBIF, the investments under the scheme are oriented towards equity and equity linked instruments of companies engaged in the infrastructure related activities and hence will be affected by risks associated with the infrastructure industries. The performance of the Scheme would be dependent upon the performance and market price movements of companies in the infrastructure industry. Amongst the infrastructure industries as mentioned under the investment strategy, the majority of the equity / equity linked investments could be concentrated under a single or a few sectors.

While mid cap and small cap stocks give one an opportunity to go beyond the usual large blue chip stocks and present possible higher capital appreciation, it is important to note that mid/small cap stocks can be riskier and more volatile on a relative basis. Therefore, the risk levels of investing in small cap and mid cap stocks is more than investing in stocks of large well-established companies. Please note that over a time these two categories have demonstrated different levels of volatility and investment returns. And it is important to note that generally, no one class consistently outperforms the others. While smaller and medium size companies may offer substantial opportunities for capital appreciation, they also involve substantial risks.

Historically, these companies have been more volatile in price than larger company securities, especially over the short term. Among the reasons for the greater price volatility are the less certain growth prospects of smaller companies, the lower degree of liquidity in the markets for such securities, and the greater sensitivity of smaller companies to changing economic conditions. Smaller companies carries large amount of liquidity risk compared to the Large Cap companies, as the ability to sell is limited by overall trading volume in the securities, which it invests.

In addition, smaller companies may lack depth of management, be unable to generate funds necessary for growth or development, or be developing or marketing new products or services for which markets are not yet established and may never become established.

They could also suffer from disadvantages such as – outdated technologies, lack of bargaining power with suppliers, low entry barriers and inadequate management depth. Overall, the risks of investing in medium / small companies are (a) transparency/liquidity levels may not be on par with established, large companies; (b) corporate governance may be an issue with some companies; and (c) they may not be resilient enough to withstand shocks of business/economic cycles.

FUSOF & FIF-TEOF may not be able to mirror the performance of underlying overseas fund(s) due to various reasons such as currency difference between FUSOF & FIF-

TEOF and underlying fund, daily revaluation of foreign exchange in FUSOF & FIF-TEOF for the portfolio valuation, entire assets of FUSOF & FIF-TEOF may not be invested in underlying fund, the amount payable/receivable on settlement date would be different as compared to the amount payable/receivable on the trade confirmation date of the investment in the FUSOF & FIF-TEOF/ underlying fund due to foreign exchange movement, difference in the date of allotment of units in FUSOF & FIF-TEOF and the investment by FUSOF & FIF-TEOF into the underlying fund etc.

Investments in the fund of funds schemes will have all the risks associated with the underlying funds.

Investments in debt instruments are subject to various risks such as credit/default risk, interest rate risk, reinvestment risk, liquidity risk etc. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.

Credit risk: This refers to the risk that an issuer of a fixed income security may default (i.e. will be unable to make timely principal and interest payments on the security).

Interest rate risk: This risk results from changes in demand and supply for money and other macroeconomic factors and creates price changes in the value of debt instruments. Consequently, the NAV of the scheme may be subject to fluctuation. Prices of long term securities generally fluctuate more in response to interest rate changes than do short-term securities. This may expose the schemes to possible capital erosion.

Liquidity Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). Liquidity risk is today characteristic of the Indian fixed income market.

Market risk: This risk arises due to price volatility due to such factors as interest sensitivity, market perception or the credit worthiness of the issuer and general market liquidity, change in interest rate expectations and liquidity flows. Market risk is a risk which is inherent to investments in securities. This may expose the schemes to possible capital erosion.

Reinvestment risk: This risk refers to the interest rate levels at which cash flows received for the securities in the Scheme is reinvested. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed. Different types of Securitised Debts in which the scheme would invest carry different levels and types of risks. Presently, secondary market for securitised papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the scheme.

Derivatives are high risk, high return instruments. A small price movement in the underlying security could have a large impact on their value and may also result in a loss.

The tax benefits available under the ELSS and other tax saving schemes are as available under the present taxation laws and are available only to certain specified categories of investors and that is subject to fulfilment of the relevant conditions. In view of the individual nature of tax consequences, each Investor/ Unit holder is advised to consult his/her own professional tax advisor. The Trustee, AMC, their directors or their employees shall not be liable

for any of the tax consequences that may arise, in the event that the Scheme is wound up before the completion of the lock-in period. Investors are requested to review the prospectus carefully and obtain expert professional advice with regard to specific legal, tax and financial implications of the investment/participation in the scheme.

Regional Market risk: Funds investing in a single region are subject to higher concentration risk and potentially greater volatility compared to funds following a more diversified policy.

Eurozone risk (FIF-TEOF): Mounting sovereign debt burdens and slowing economic growth among European countries, combined with uncertainties in European financial markets, including feared or actual failures in the banking system and the possible break-up of the Eurozone and Euro currency, may adversely affect interest rates and the prices of both fixed

income and equity securities across Europe and potentially other markets as well. These events may increase volatility, liquidity and currency risks associated with investments in Europe. In any event of the break-up of the Eurozone or Euro currency, the relevant funds may be exposed to additional operational or performance risks. While the European governments, the European Central Bank, and other authorities are undertaking economic reforms and other measures to address the current fiscal conditions, these measures may not have the desired effect and therefore the future stability and growth of Europe is uncertain. The performance and value of the fund may be adversely affected, should there be any adverse credit events. There is no assurance or guarantee that the objectives of the scheme will be achieved. The past performance of the mutual funds managed by the Franklin Templeton Group and its affiliates is not necessarily indicative of future performance of the scheme.

Risks associated with securities issued by Banks and PSUs (FIBPDF): The risks associated with debt and money market securities issued by banks and PSUs are perceived to be lower compared to other fixed income instruments. However, these entities are unique in terms of being heavily regulated and affected by government policies, which could impact the credit profile of these issuers.

There is no assurance or guarantee that the objectives of the scheme will be achieved. The past performance of the mutual funds managed by the Franklin Templeton Group and its affiliates is not necessarily indicative of future performance of the scheme.

Risk Mitigation Factors:

Equity

Liquidity Risk: The fund will try to maintain a proper asset liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying stocks. FISC will endeavour to invest in a mix of Smaller Companies and Other Companies stocks (as defined in the asset allocation) and also try to maintain a portion of investments in cash & liquid assets.

Concentration Risk: Except in case of sector funds and FBIF, the schemes will endeavour to have a well-diversified equity portfolio comprising stocks across various sectors of the economy. This would aid in managing concentration risk and sector-specific risks. Generally, diversification across market cap segments also aids in managing volatility and ensuring adequate liquidity at all times.

Derivatives Risk: The fund will endeavour to maintain adequate controls to monitor the derivatives transactions entered into.

Debt

Interest Rate Risk: The Fund seeks to mitigate this risk by keeping the maturity of the schemes in line with the interest rate expectations.

Credit Risk or default risk: The Fund will endeavour to minimise Credit/Default risk by primarily investing in medium-high investment grade fixed income securities rated by SEBI registered credit rating agencies. Historical default rates for investment grade securities (BBB and above) have been low.

Reinvestment Risk: Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value. The schemes may take positions in interest rate derivatives to hedge market/interest rate risks.

Liquidity or Marketability Risk: The fund will endeavour to minimise liquidity risk by investing in securities having a liquid market.

Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF) (Applicable to FIMMF, FICDF, FILF, FIFRF, FIBPDF and FIDHF):

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to begin

with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus this backstop facility will help fund managers of the aforementioned Schemes to better generate liquidity during market dislocation to help the schemes fulfill liquidity obligations under stress situation.

Dividend (Income Distribution cum capital withdrawal) Policy: Income Distribution cum capital withdrawal (IDCW) is based on the availability of adequate distributable surplus in the scheme. The amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. The Trustee may, at its sole discretion distribute income under IDCW option/plan in the fund at any time. Although there is every intention to distribute income, there is no assurance or guarantee as to the frequency or quantum of such distribution nor that the distributions be regularly paid.

No Load on Bonus / Reinvestment of Income Distribution cum capital withdrawal option: No entry and exit load shall be charged on bonus units or units allotted on reinvestment of Income Distribution cum capital withdrawal.

Commission to distributor

The upfront commission on investment made by the investor, if any, shall be paid to the ARN Holder (AMFI registered distributor) directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder.

Credit of exit load to schemes:

Effective October 01, 2012, Exit load/ CDS (if any) charged to the unit holders by the Mutual Fund on redemption (including switchout) of units shall be credited to the respective scheme net of service tax. Service tax on exit load, if any, shall be paid out of the exit load proceeds.

EUIIN needs to be mentioned on the application alongwith the ARN number. This will assist in tackling the problem of mis-selling even if the employee/ relationship manager/sales person leave the employment of the ARN holder / Sub broker. In case the transaction is executed without any interaction or advice by the employee/relationship manager/ sales person of the distributor/sub broker, the investor needs to sign the declaration stating the same.

Non acceptance of Third Party payment

If the AMC shall not accept subscriptions with Third Party payment instruments in the Scheme, except in cases of (a) Payment by Employer on behalf of employee for lump sum/one-time subscription or under SIP through Payroll deductions or deductions out of expense reimbursement; (b) Custodian on behalf of an FII or a client. (c) Payment by Asset Management Company to a Distributor empanelled with it on account of commission/incentive etc. in the form of the Mutual Fund Units of the Funds managed by such AMC through Systematic Investment Plans or lump sum/ one-time subscription, subject to compliance with SEBI Regulations and Guidelines issued by AMFI, from time to time; (d) Payment by Corporate to its Agent/ Distributor/ Dealer (similar arrangement with Principal-agent relationship), on account of commission/ incentive payable for sale of its goods/services in form of mutual fund units through SIP or lump sum/ one-time subscription. For this purpose Third Party payment shall mean payment made through instruments issued from an account other than that of the beneficiary investor. It is clarified that in case of payments from a joint bank account, the first holder of the mutual fund folio has to be one of the joint holders of the bank account from which payment is made. In terms of the Prevention of Money Laundering Act, 2002, the Rules / guidelines/circulars issued there under (AML Laws), Mutual Funds are required to formulate and implement a client identification programme, to collect, verify and maintain the record of identity and address(es) of investors.

It is mandatory for all investors (including joint holders, NRIs, POA holders and guardians in the case of minors) to furnish such documents and information as may be required to comply with the Know Your Customers (KYC) policies under the AML Laws.

Applications without such documents and information may be rejected.

Submission of PAN:

As per Para 14.11 of SEBI Master Circular on Mutual Funds dated June 27, 2024, Permanent Account Number (PAN) would be the sole identification number for all participants transacting in the securities market, irrespective of the amount of transaction, except (a) investors residing in the state of Sikkim; (b) Central Government, State Government, and the officials appointed by the courts e.g. Official liquidator, Court receiver etc. (under the category of Government) and (c) investors participating only in micro-pension. SEBI, in its letter dated July 24, 2012 has conveyed that investments in mutual fund schemes [including investments through Systematic Investment Plan (SIP)] of up to Rs.50,000/- per year per investor shall be exempted from the requirement of PAN.

Accordingly, where the aggregate of lump sum investment (fresh purchase and additional purchase) and SIPs where the aggregate of instalments in a financial year i.e. April to March does not exceed Rs.50,000/- (referred to as "Micro investment"), it shall be exempt from the requirement of PAN.

Such investors are required to provide alternate proof of identity in lieu of PAN for KYC purposes and are allotted PAN-exempt KYC Reference Number (PEKRN). This exemption will be available only to Micro investment made by individuals being Indian citizens (including NRIs, joint holders, minors acting through guardian and sole proprietary firms). PIOs, HUFs, QFIs and other categories of investors will not be eligible for this exemption.

For the purpose of identifying Micro investment, applications shall be aggregated at the investor level (same sole holder/joint holders in the same sequence) and such aggregation shall be done irrespective of the number of folios / accounts under which the investor is investing and irrespective of source of funds, mode, location and time of application and payment.

Investors are required to register their PAN with the Mutual Fund by providing the PAN card copy. E-PAN issued by CDDT can also be provided by FPI. All investments without PAN (for all holders, including Guardians and POA holders) are liable to be rejected.

All transactions in Franklin Templeton Mutual Fund need to

It is clarified that all categories of investors seeking exemption from PAN still need to complete the KYC requirements stipulated by the AMC/Trustee from time to time, irrespective the amount of investment.

4. Unitholders whose folio(s) has/have been frozen due to the above requirement shall be able to (permitted to) lodge grievance or avail service request only after furnishing the above details. Non applicability Minimum Application Amount (Lump-sum) and Minimum Redemption amount

On failure to do so, his/her PAN shall become inoperative and he/she shall be liable to all the consequences under the Income Tax Act, 1961 for not furnishing, intimating or quoting the PAN.

Therefore, it is mandatory for investors to link PAN with Aadhaar. The said guidelines came into effect from the October 1, 2021.

In accordance with the regulatory requirement, the minimum application amount and minimum redemption amount will not be applicable for investment made in schemes of the Fund in compliance with the aforesaid circular(s).
