TEMPLETON**

Understanding The Factsheet

Fund Manager

An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription/Minimum Investment

This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount

This is the minimum investment amount for an existing investor in a mutual fund scheme.

SIP

SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs 500 every 15th of the month in an equity fund for a period of three years.

NAV

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Entry Load

A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent.

Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs 100 and the entry load is 1%, the investor will enter the fund at Rs 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor

Exit Load

Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance if the NAV is Rs.100 and the exit load is 1%, the redemption price would be Rs.99 per unit.

Yield to Maturity/ Portfolio Yield

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity. Portfolio yield is weighted average YTM of the securities.

Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Macaulay Duration

Macaulay duration is defined as the weighted average time to full recovery of principal and interest payments of a bond i.e. the weighted average maturity of cash flows. The weight of each cash flow is determined by dividing the present value of the cash flow by the price of the bond.

Standard Deviation

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta

Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM

AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stockmarkets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

All investments in debt funds are subject to various types of risks including credit risk, interest rate risk, liquidity risk etc. Some fixed income schemes may have a higher concentration to securities rated below AA and therefore may be exposed to relatively higher risk of downgrade or default and the associated volatility in prices which could impact NAV of the scheme. Credit rating issued by SEBI registered entities is an opinion of the rating agency and should not be considered as an assurance of repayment by issuer. There is no assurance or guarantee of principal or returns in any of the mutual fund scheme.

Composition by Assets - Main Portfolio

Composition by Rating - Main Portfolio

All investments in debt funds are subject to various types of risks including credit risk, interest rate risk, liquidity risk etc. Some fixed income schemes may have a higher concentration to securities rated below AA and therefore may be exposed to relatively higher risk of downgrade or default and the associated volatility in prices which could impact NAV of the scheme. Credit rating issued by SEBI registered entities is an opinion of the rating agency and should not be considered as an assurance of repayment by issuer. There is no assurance or guarantee of principal or returns in any of the mutual fund scheme.

Please note that this scheme of Franklin Templeton Mutual Fund is under winding-up and SBI Funds Management Private Limited has been appointed as the liquidator as per the order of Hon'ble Supreme Court dated February 12, 2021. Impact of Segregation

8.25% Vodafone Idea Ltd 10JUL20 and 10.90% Vodafone Idea Ltd 02SEP2023 have been segregated from the main portfolio effective January 24, 2020. Creation of the segregated portfolio has no further impact on the NAV of the fund beyond the fair valuation of these securities done on January 16, 2020.

Post the creation of the segregated portfolio (8.25% Vodafone Idea Ltd 10JUL20) on January 24, 2020, the annual coupon was due and received by the segregated portfolio on June 12, 2020. This interest receipt as a percentage of the Net assets of the scheme as on January 23, 2020 is 0.13%. Subsequently, the full principal due, along with the interest from June 12, 2020 to July 9, 2020 was received by the segregated portfolio on the maturity date i.e. July 10, 2020. This full and final receipt of the maturity amount (net of operating expenses as permissible under the SEBI Regulation), as a percentage of Net assets of the scheme as on January 23, 2020 is 1.60%.

Post the creation of the segregated portfolio (10.90% Vodafone Idea Ltd 2Sep2023) on January 24, 2020, an interest payment was received by the segregated portfolio on September 3, 2020. This interest receipt as a percentage of the Net assets of the scheme as on January 23, 2020 is 0.57%.
