Maturity profile of schemes (cash flow projections) basis Portfolio holdings as on March 31, 2021

- (a) The below table summarises the amounts receivable on maturity dates or if put option is available then the immediately forthcoming put option date
- (b) The percentages have been computed considering the total of all amounts receivable from the holdings as on March 31, 2021 plus the available cash distributed ##, cash and cash equivalents as on March 31, 2021, as the
- Part payment amounts receivable on pre-agreed dates as per terms of issuance are reflected in the respective (c) buckets per receipt dates
- Net Asset Value per unit will continue to be computed and declared as per the same accounting and valuation (d) principles as done prior to April 23, 2020 without any change
- (e) For perpetual bonds, the immediately forthcoming call date is considered as the maturity date
- For Securities which are fair valued by the AMC, the fair valuation as on March 31, 2021 is considered as the (f) maturity value. Note that, at maturity, the issuer is obligated to pay the face value and accrued coupons/ other accruals, if any as per the terms of the issuance
- The data excludes any recovery from segregated portfolios. Receipt of interest and principal repayments (g) from segregated portfolios will accordingly increase payout to investors of the segregated portfolio
- (h) Interest income is not considered in the projections. Receipt of coupons will add to the cash flows and accordingly increase payout to investors
- (i) On sale of securities in the secondary market, sale value may differ from the maturity value
- For securities with interest rate reset at periodic intervals which have a floor and cap rate as per the terms of (i) the issuance, maturity date has been considered for the cash flow projections vis-à-vis the interest reset date which is normally considered in macaulay duration and valuation by the valuation agencies
- (k) Securities sold in the secondary market prior to the maturity will accelerate the receipt thereby facilitating payout to investors before scheduled maturity
- Prepayments or accelerated payments made by the issuer will prepone the receipt thereby facilitating payout (1) to investors before scheduled maturity
