Call, Cash & Other Assets is net of interest receivable on securities, investment in overnight call money market, expenses payable etc.

\$\$\$ These instruments have interest rate reset with no floor and no cap on the interest rate. For maturity profile/ cash flow projections, interest rate reset date is considered as the maturity date.

!!! These instruments are Unlisted. Total exposure as on October 29, 2020 is 6.33%

*** These instruments have interest rate reset with a floor and a cap on the interest rate. Independent valuation agencies typically value these instruments at the nearest interest rate reset date and accordingly the Macaulay Duration of the fund is computed. Further, there is a possibility of redemption of bond (as per the terms of the issuance) in case of non-acceptance of interest rate and hence the independent valuation agencies consider the interest rate reset date as the maturity date. Accordingly, the Macaulay Duration of these securities measures the interest rate risk upto the interest rate reset date which is reflected in Macaulay Duration of the fund. In the Maturity profile/ cash flow projections, we have assumed that the instruments with a floor and a cap on interest rate will continue till maturity given the current market conditions.

Essel Infra Projects Ltd - Further to the favorable decision from the Delhi High Court, the Debenture Trustees have sold the entire shares of Zee Entertainment Enterprises Ltd. and recovered Rs. 9,234.61 Lakhs (across the 4 schemes) which is slightly higher than the value at which the Essel Infra projects NCDs were valued in these schemes. We will continue our efforts to recover the maximum value for the benefit of the unitholders. Recovery made by Franklin India Low Duration Fund is 4,387.74 Lakhs. For more details, kindly refer to the [note](#) on our website

*** These instruments have interest rate reset with a floor and a cap on the interest rate. Independent valuation agencies typically value these instruments at the nearest interest rate reset date and accordingly the Macaulay Duration of the fund is computed. Further, there is a possibility of redemption of bond (as per the terms of the issuance) in case of non-acceptance of interest rate and hence the independent valuation agencies consider the interest rate reset date as the maturity date. Accordingly, the Macaulay Duration of these securities measures the interest rate risk upto the interest rate reset date which is reflected in Macaulay Duration of the fund. In the Maturity profile/ cash flow projections, we have assumed that the instruments with a floor and a cap on interest rate will continue till maturity given the current market conditions.

\$\$\$ These instruments have interest rate reset with no floor and no cap on the interest rate. For maturity profile/ cash flow projections, interest rate reset date is considered as the maturity date.

*** These instruments have interest rate reset with a floor and a cap on the interest rate. Independent valuation agencies typically value these instruments at the nearest interest rate reset date and accordingly the Macaulay Duration of the fund is computed. Further, there is a possibility of redemption of bond (as per the terms of the issuance) in case of non-acceptance of interest rate and hence the independent valuation agencies consider the interest rate reset date as the maturity date. Accordingly, the Macaulay Duration of these securities measures the interest rate risk upto the interest rate reset date which is reflected in Macaulay Duration of the fund. In the Maturity profile/ cash flow projections, we have assumed that the instruments with a floor and a cap on interest rate will continue till maturity given the current market conditions.

\$\$\$ These instruments have interest rate reset with no floor and no cap on the interest rate. For maturity profile/ cash flow projections, interest rate reset date is considered as the maturity date.

*** These instruments have interest rate reset with a floor and a cap on the interest rate. Independent valuation agencies typically value these instruments at the nearest interest rate reset date and accordingly the Macaulay Duration of the fund is computed. Further, there is a possibility of redemption of bond (as per the terms of the issuance) in case of non-acceptance of interest rate and hence the independent valuation agencies consider the interest rate reset date as the maturity date. Accordingly, the Macaulay Duration of these securities measures the interest rate risk upto the interest rate reset date which is reflected in Macaulay Duration of the fund. In the Maturity profile/ cash flow projections, we have assumed that the instruments with a floor and a cap on interest rate will continue till maturity given the current market conditions.

\$\$\$ These instruments have interest rate reset with no floor and no cap on the interest rate. For maturity profile/ cash flow projections, interest rate reset date is considered as the maturity date.

*** These instruments have interest rate reset with a floor and a cap on the interest rate. Independent valuation agencies typically value these instruments at the nearest interest rate reset date and accordingly the Macaulay Duration of the fund is computed. Further, there is a possibility of redemption of bond (as per the terms of the issuance) in case of non-acceptance of interest rate and hence the independent valuation agencies consider the interest rate reset date as the maturity date. Accordingly, the Macaulay Duration of these securities measures the interest rate risk upto the interest rate reset date which is reflected in Macaulay Duration of the fund. In the Maturity profile/ cash flow projections, we have assumed that the instruments with a floor and a cap on interest rate will continue till maturity given the current market conditions.

\$\$\$ These instruments have interest rate reset with no floor and no cap on the interest rate. For maturity profile/ cash flow projections, interest rate reset date is considered as the maturity date.

*** These instruments have interest rate reset with a floor and a cap on the interest rate. Independent valuation agencies typically value these instruments at the nearest interest rate reset date and accordingly the Macaulay Duration of the fund is computed. Further, there is a possibility of redemption of bond (as per the terms of the issuance) in case of non-acceptance of interest rate and hence the independent valuation agencies consider the interest rate reset date as the maturity date. Accordingly, the Macaulay Duration of these securities measures the interest rate risk upto the interest rate reset date which is reflected in Macaulay Duration of the fund. In the Maturity profile/ cash flow projections, we have assumed that the instruments with a floor and a cap on interest rate will continue till maturity given the current market conditions.
