Product Label

This product is suitable for investors who are seeking*:

- Regular income for short term with high level of safety and liquidity
- Investment in debt & money market instruments having maturity of one business day

Investors understand that their principal will be at Low risk

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

All investments in debt funds are subject to various types of risks including credit risk, interest rate risk, liquidity risk etc. Some fixed income schemes may have a higher concentration to securities rated below AA and therefore may be exposed to relatively higher risk of downgrade or default and the associated volatility in prices which could impact NAV of the scheme. Credit rating issued by SEBI registered entities is an opinion of the rating agency and should not be considered as an assurance of repayment by issuer. There is no assurance or guarantee of principal or returns in any of the mutual fund scheme.

*ICRA has assigned a credit rating of (ICRA)A1+mfs to Franklin India Overnight Fund (FIONF). The ratings assigned are basis the portfolio of the scheme with the credit score of the portfolio being comfortable at the assigned rating level.

The rating indicates ICRA's opinion on the credit quality of the portfolios held by the funds. The rating does not indicate the asset management company's (AMC) willingness or ability to make timely payments to the fund's investors. The rating should not be construed as an indication of expected returns, prospective performance of the mutual fund scheme, NAV or of volatility in its returns. ICRA's mutual fund rating methodology is based on evaluating the inherent credit quality of the fund's portfolio. As a measure of the credit quality of a debt fund's assets, ICRA uses the concept of 'credit scores'. These scores are based on ICRA's estimates of the credit risk associated with each exposure of the portfolio taking into account its maturity. To quantify the credit risk scores, ICRA uses its database of historical default rates for various rating categories and maturity buckets. The credit risk ratings incorporate ICRA's assessment of a debt fund's published investment objectives and policies, its management characteristics, and the creditworthiness of its investment portfolio. ICRA reviews relevant fund information on an ongoing basis to support its published rating opinions. If the portfolio credit score meets the benchmark of the assigned rating during the review, the rating is retained. If the benchmark credit score is breached, ICRA gives a month's time to the debt fund manager to bring the portfolio credit score within the benchmark credit score. If the debt fund manager is able to reduce the portfolio credit score within the benchmark credit score, the rating is retained. If the portfolio continues to breach the benchmark credit score, the rating is revised to reflect the change in the credit quality.
