INVESTMENT OBJECTIVE	To provide long-term capital appreciation by predominantly investing in equity and equity related securities of technology and technology related companies.			
ASSET ALLOCATION PATTERN OF THE SCHEME	Under normal market circumstances, the investment range would be as follows:			
	Instruments	Risk Profile	% of Assets#	
	Equity/Equity related instruments of technology and technology related companies	High-Medium	80-100%	
	Debt & Money Market instruments*	Low	0-20%	
	#including investments in Foreign Securities as may be permitted by SEBI/RBI upto 35% of net assets If permitted by SEBI under extant regulations/guidelines, the Scheme may engage in short			

	<p>selling of securities and scrip lending as provided under Securities Lending Scheme 1997, and other applicable guidelines/regulations, as amended from time to time. A maximum of 20% of net assets may be deployed in securities lending and the maximum single counter party exposure may be restricted to 5% of net assets outstanding at any point of time.</p> <p>* including securitised debt up to 20%</p> <p>The scheme may enter into derivatives in line with the guidelines prescribed by SEBI from time to time. The scheme may take exposure in derivatives up to a maximum of 50% of its AUM. The exposure limit per scrip/instrument shall be to the extent permitted by the SEBI Regulation for the time being in force. These limits will be reviewed by the AMC from time to time.</p> <p>The fund managers will follow an active investment strategy taking defensive/aggressive postures depending on opportunities available at various points in time.</p> <p>The asset allocation pattern described above may alter from time to time on a short-term basis on defensive considerations, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors and would, in such cases, shall be rebalanced within 30 days from date of deviation. However, if the asset allocation pattern is to be altered for other reasons, as this is a fundamental attribute, the procedure outlined in the paragraph on fundamental attributes below, shall be followed.</p>
<p>INVESTMENT STRATEGY</p>	<p>The scheme seeks to achieve long-term capital appreciation through investments in companies across market capitalizations in Indian as well as global markets which are expected to benefit from the development, advancement and use of technology. These will predominantly include companies in the following industries:</p> <ul style="list-style-type: none"> • Technology services, including software, IT management, Data and IT Infrastructure services including Mobile computing, cloud computing infrastructure • Internet technology enabled services including e-commerce, technology platforms, IoT (Internet of Things) and other online services • Electronic technology, including computers, computer products, and electronic components • Telecommunications, including networking, wireless, and wire-line services, equipment and support; • Media and information services, including the distribution of information and content providers • IT products, hardware and components like PCs, Laptops, Servers, Chips, Semi-conductors etc. <p>The fund will follow a bottom-up approach to stock-picking. The portfolio composition of the scheme will be primarily guided by the type of issuers, sectors or industry comprised within the scheme benchmark.</p>
<p>RISK PROFILE OF THE SCHEME</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <ul style="list-style-type: none"> • Different types of securities in which the scheme would invest carry different levels and types of risks. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. • Trading volumes, settlement periods and transfer procedures may restrict liquidity of investments in equity and equity related securities. • In case of investments in foreign securities, there may be risks associated with currency movements, restrictions on repatriation and transaction procedures in overseas market as well as country related risks. • The scheme would primarily invest in the technology and technology related companies and thereby restricting the diversification of the scheme. Therefore, the performance of the scheme would be dependent upon the performance and market price movements of companies in the said industry/sector. Hence, movements in the NAV of the scheme would be more volatile compared to the NAV of a scheme with a more diversified portfolio. • Investments in debt instruments are subject to various risks such as credit/default risk,

	<p>interest rate risk, reinvestment risk, liquidity risk etc. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.</p> <ul style="list-style-type: none"> • Credit risk: This refers to the risk that an issuer of a fixed income security may default (i.e. will be unable to make timely principal and interest payments on the security). • Interest rate risk: This risk results from changes in demand and supply for money and other macroeconomic factors and creates price changes in the value of debt instruments. • Consequently, the NAV of the scheme may be subject to fluctuation. Prices of long term securities generally fluctuate more in response to interest rate changes than do short-term securities. This may expose the schemes to possible capital erosion. • Liquidity Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). Liquidity risk is today characteristic of the Indian fixed income market. • Market risk: This risk arises due to price volatility due to such factors as interest sensitivity, market perception or the credit worthiness of the issuer and general market liquidity, change in interest rate expectations and liquidity flows. Market risk is a risk which is inherent to investments in securities. This may expose the schemes to possible capital erosion. • Reinvestment risk: This risk refers to the interest rate levels at which cash flows received for the securities in the Scheme is reinvested. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed. • Different types of Securitised Debts in which the scheme would invest carry different levels and types of risks. Presently, secondary market for securitised papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the scheme. • Derivatives are high risk, high return instruments. A small price movement in the underlying security could have a large impact on their value and may also result in a loss. • Engaging in securities lending is subject to risks related to fluctuations in collateral value and settlement/liquidity and counter party risks • There is no assurance or guarantee that the objectives of the scheme will be achieved. The past performance of the mutual funds managed by the Franklin Templeton Group and its affiliates is not necessarily indicative of future performance of the scheme.
<p>RISK MITIGATION FACTORS</p>	<p>Equity</p> <ul style="list-style-type: none"> • Liquidity Risk: The fund will try to maintain a proper asset liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying stocks. • Generally, diversification across market cap segments also aids in managing volatility and ensuring adequate liquidity at all times. • Derivatives Risk: The fund will endeavour to maintain adequate controls to monitor the derivatives transactions entered into. <p>Debt</p> <ul style="list-style-type: none"> • Interest Rate Risk: The Fund seeks to mitigate this risk by keeping the maturity of the scheme in line with the interest rate expectations. • Credit risk or default risk: The Fund will endeavour to minimise Credit/Default risk by primarily investing in medium-high investment grade fixed income securities rated by SEBI registered credit rating agencies. Historical default rates for investment grade securities (BBB and above) have been low. • Reinvestment Risk: Reinvestment risks will be limited to the extent of coupons received on debt instruments, which will be a very small portion of the portfolio value. • Liquidity or Marketability Risk: The fund will endeavour to minimise liquidity risk by inve

	<p>sting in securities having a liquid market.</p>
<p>PLANS AND OPTIONS</p>	<ul style="list-style-type: none"> • Growth Plan • Dividend Plan (with Reinvestment and Payout Options) • Direct – Growth Plan • Direct – Dividend Plan (with Reinvestment and Payout Options) <p>Default Plan - Direct Plan (for investments not routed through a AMFI registered mutual fund distributor)</p> <p>Default Plan/ Option - Growth in case Growth or Dividend is not indicated. Dividend Reinvestment in case Dividend Payout or Dividend Reinvestment is not indicated.</p> <p>Compulsory reinvestment of Dividend Where the Unitholder has opted for Dividend Payout option and in case the amount of dividend payable to the Unitholder is Rs.20/- or less, the same will be compulsorily reinvested in the scheme.</p>

	<p>identified by their Permanent Account Numbers (PAN) in the same sequence). Such aggregation shall be done irrespective of the number of folios under which the investor is investing and irrespective of source of funds, mode, location and time of application and payment. Accordingly the applicable NAV for such applications shall be the closing NAV of the Business Day on which the funds are available for utilisation before the cut off time (currently 3:00 p.m.) in case of each application. In case funds are received on separate days and are available for utilisation on different Business Days before the cut off time, the applicable NAV shall be of the closing NAV of the Business day(s) on which the cleared funds are available for utilization for the respective application. It is clarified that switches and transactions under SIP, STP, DTP and stock exchange infrastructure will not be considered for aggregation of applications. Prevention of Money Laundering

In terms of the Prevention of Money Laundering Act, 2002, the Rules / guidelines/circulars issued there under (AML Laws), Mutual Funds are required to formulate and implement a client identification programme, to collect, verify and maintain the record of identity and address(es) of investors. It is mandatory for all investors (including joint holders, NRIs, POA holders and guardians in the case of minors) to furnish such documents and information as may be required to comply with the Know Your Customers (KYC) policies under the AML Laws.

Applications without such documents and information may be rejected.

Submission of PAN:

In terms of SEBI circulars dated April 27, 2007, April 03, 2008 and June 30, 2008 read with SEBI letter dated June 25, 2007, Permanent Account Number (PAN) would be the sole identification number for all participants transacting in the securities market, irrespective of the amount of transaction, except (a) investors residing in the state of Sikkim; (b) Central Government, State Government, and the officials appointed by the courts e.g. Official liquidator, Court receiver etc. (under the category of Government) and (c) investors participating only in micro-pension. SEBI, in its letter dated July 24, 2012 has conveyed that investments in mutual fund schemes [including investments through Systematic Investment Plan (SIP)] of up to Rs.50,000/- per year per investor shall be exempted from the requirement of PAN.

Accordingly, where the aggregate of lump sum investment (fresh purchase and additional purchase) and SIPs where the aggregate of instalments in a financial year i.e. April to March does not exceed Rs.50,000/- (referred to as "Micro investment"), it shall be exempt from the requirement of PAN.

However, a duly verified/attested copy of such document(s) as may be prescribed by the AMC/Trustee from time to time, needs to be submitted as the proof of identification in lieu of PAN Card copy. This exemption will be available only to Micro investment made by individuals being Indian citizens (including NRIs, joint holders, minors acting through guardian and sole proprietary firms). PIOs, HUFs, QFIs and other categories of investors will not be eligible for this exemption.

For the purpose of identifying Micro investment, applications shall be aggregated at the investor level (same sole holder/joint holders in the same sequence) and such aggregation shall be done irrespective of the number of folios / accounts under which the investor is investing and irrespective of source of funds, mode, location and time of application and payment.

Thus, submission of PAN is mandatory for all existing as well as prospective investors (including all joint applicants/holders, guardians in case of minors, POA holders and NRIs but except for the categories mentioned above) for investing with mutual funds. Investors are required to register their PAN with the Mutual Fund by providing the PAN card copy. E-PAN issued by CBDT can also be provided by FPI. All investments without PAN (for all holders, including Guardians and POA holders) are liable to be rejected.

All investments in Franklin Templeton Mutual Fund need to comply with the PAN and KYC requirements as stated above, failing which the applications are liable to be rejected. It is clarified that all categories of investors seeking exemption from PAN still need to complete the KYC requirements stipulated by the AMC/Trustee from time to time, irrespective the amount of investment.
